UŽIVAJTE U ENOGASTRONOMSKOM BLAGU HERCEGOVINE!

ŽIVJELI!!

S VINOM KROZ VRIJEME HERZEGOVINA

WINE ROUTE WITH WINE THROUGH TIME

Gdje ima vina ima i ...

... kulture, s tim i prirodnih ljepota, vrhunske gastronomije, radosti i kulture življenja ...

Hercegovina, zemљa svjetlosti sa svojim gostoljubljivim vinarima i ugostiteljima već šest godina ima svoju Vinsku cestu Hercegovine, proizvod u kome je objedinjeno sve ono sto vrijedi posjetiti, kušati i doživjeti ...

Osjećamo se jako dobro u našoj mediteranskoj klimi i prirodnim uvjetima gdje i vas pozivamo na doživljaj. Kroz sredinu Hercegovine protiče rijeka Neretva, žila kucavica oko koje je život isprepletan od davmina uz koju se mogu pronaći atraktivni turistički sadržaji. Sa sjevera je planinski lanac koji je pun čistog zraka, divljači i prekrasnih prizora koji je zimi pogodan za zimske sportove, a ljeti za planinarenje, slijedi mediteranski krajolik, kameni krš, mediteransko raslinje intezivnog mirisa koje posjetitelje ne ostavlja ravnodušnima i na kraju Sunce koje se u Hercegovini manifestira u najvećoj snazi koje pokreće vinogradarstvo i čija je intezivna snaga osjetna u vrhunskim kapljicama hercegovačkih vina ... ponavljajuće u autohtonim vinima Žilavke i Blatine ...

Najljepše od svega je ugodna šetnja ili vožnja hercegovačkom vinskom cestom, hercegovačkim mjestima, selima i nezaboravnim krajolicima ... gdje vas uz put prate vinogradi, maslinici, ljekovito bilje ... susrećući gostoljubljive vinare i uživajući u njihovim vinima, pričama i hercegovačkim s ljubavlju spremanim autohtonim delicijama ...

Vaša „vinska tura“ hercegovačom vinskom cestom, grupna, obiteljska ili pojedinačna će ostaviti na vas utisak ispunjenosti i inspiracije o kojem ćete dugo pričati ili se uvek ponovo vraćati ...

Where there is wine there is ...

culture, natural beauties, excellent food, joy and culture of living...

Herzegovina, the land of light with its hospitable wine producers and caterers, proudly invites you to its Herzegovina Wine Route, a product which encompasses everything worth visiting, tasting and experiencing.

We feel great in our Mediterranean climate and natural conditions so we invite you to experience it too.

The Neretva River flows through the middle of Herzegovina. It is the main „artery“ of the region teeming with life since ancient times. Its banks offer many tourist attractions, a mountain range on the north with its fresh air, wildlife and picturesque surroundings suitable for winter sports or hiking during summer, Mediterranean karst abundant in aromatic vegetation which leaves no one indifferent and the Sun manifesting its utmost strength in Herzegovina by helping the process of winegrowing and whose intensive power can be felt and tasted in every drop of Herzegovinian wines... particularly Žilavka and Blatina...

The most wonderful is certainly a pleasant walk or ride along the Herzegovina Wine Route, through Herzegovinian settlements, villages and unforgettable landscape, surrounded by vineyards, olive groves, herbs, meeting hospitable wine producers and enjoying their wines, stories and autochthonous Herzegovinian specialities prepared with sincere love and devotion.

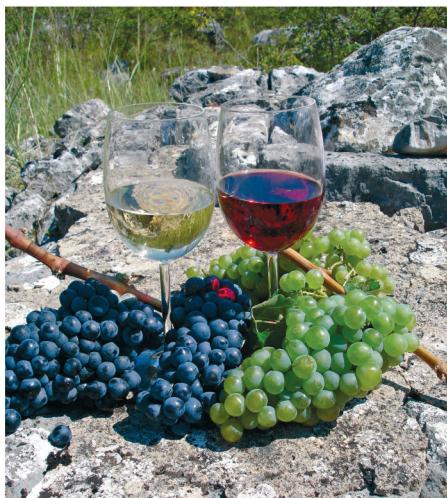

Your “wine tour” along the Herzegovinian wine route, whether it is a group one, with your family or individual, will leave an impression of fulfillment and inspiration... which you will talk about for a long time or come back to again...

Turističke destinacije Hercegovine // Touristic destinations of Herzegovina

Kao povijesna regija, Hercegovina nudi puno povijesnih lokaliteta kao što je Stari Grad u Mostaru, Trebinje, Počitelj, Blagaj, Mogorjelo, Radimlja, Ljubaška tvrđava itd. U hercegovačkim muzejima su sačuvani nalazi i iskopine iz daleke povijesti. Upravo zbog toga, Hercegovina svakom gostu nudi «šetnju» kroz vrijeme. Mostar joj je glavni grad i zajedno s Međugorjem – hodočasničkim središtem, ljetovalištem Neumom i ostalim atrakcijama predstavlja jednu od najpoželjnijih regija u jugoistočnoj Europi.

As a historical region, Herzegovina has to offer a lot of historical locations such as the Old Town in Mostar, Trebinje, Počitelj, Blagaj, Mogorjelo, Radimlja, the Fort in Ljubaški etc. Findings and artefacts from the past are being kept in museums all around Herzegovina. For this reason, Herzegovina offers a “walk through history” to every visitor. Its capital Mostar, Međugorje – a famous pilgrimage site, seaside resort Neum and other attractions make it one of the most attractive regions in South East Europe.

Povijest uzgoja vinove loze

Ovdje se vino pije preko 2200 godina

Bosna i Hercegovina baštini vinogradarsko vinarsku kulturu još od ilirskoga doba. Prve sadnice vinove loze su na Balkan donijeli Tračani.

Kada govorimo o povijesti uzgoja vinove loze u BiH, bitno je napomenuti da je ovo područje bilo u znatno širim granicama od današnjih. Naime srednjovjekovna Bosna je nekada bila, i bez kasnije pripojenog južnog djela (Huma), prepoznatljiva vinogradarsko vinarska zemlja. U srednjem vijeku je gotovo svaka velikaška obitelj u Bosni imala svoje vino-grade. O ovome jasno govore prvi detaljni katastarski popisi koji datiraju iz XV. i XVI. stoljeća.

Dolaskom Turaka, i procesom islamizacije Bosne, ova proizvodnja se u XVI., XVII., i XVIII. stoljeću postupno gasi, i na kraju nestaje.

Uzroci nestanka vinove loze u Bosni su višestruki, a najzaslužniji su česti ratovi, jer vinova loza kao kultura zahtjeva visok stupanj ljudskog angažmana.

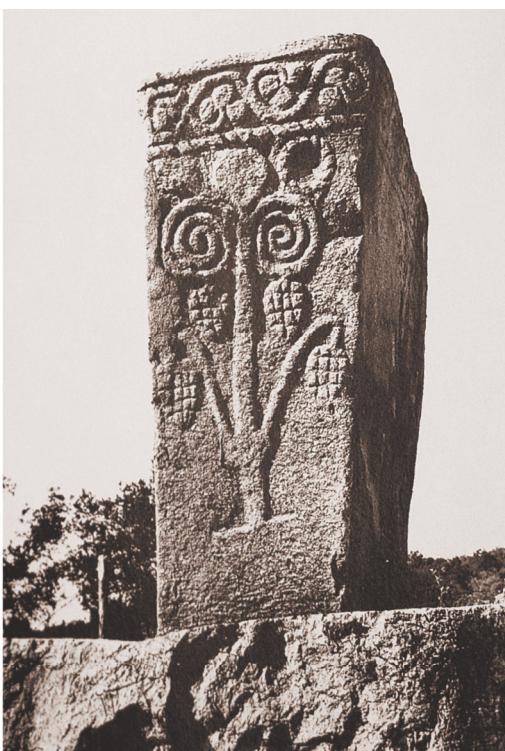

Proizvodnja vina danas je ograničena na slivna područja rijeke Neretve i Trebišnjice, odnosno hercegovački vinogradarski rajon s mostarskim, lištičkim i jablaničkim vinogorjem.

Vinarstvo kao gospodarska grana postaje značajan izvor prihoda u Hercegovini krajem IXX. stoljeća, kada se bilježe i prvi izvozi vina prema zapadnoj Europi, a ovakav trend se nastavlja osvajanjem tržišta širom svijeta.

Vinarstvo u Hercegovini imalo je svojih uspona i padova ali nikada nije prestalo biti glavna grana poljoprivrede, a može se reći i način života ovdašnjih ljudi.

Hercegovački vinar danas žele i hoće biti prepoznati po njihovoj Žilavci i Blatini kao jedinstvenim sortama u vinarskom svijetu, i prezentirati sebe svijetu kroz ovo vino koje u sebi nosi miris zemlje i žestinu hercegovačkog sunca.

*Kada bi mogli uskrsnuti svi oni ovdje pod kamen pokopani,
možda bi pri jarkoj svjetlosti svanuća prepoznali svoje neis-
punjene težačke snove.*

*If those buried under the stone could resurrect, they would
maybe, illuminated by a strong light of daybreak, recognize
their unrealized farmer's dreams.*

(Zdravko Ostojić)

History of winegrowing

Wine has been consumed here for 2200 years

The culture of winegrowing and wine production in Bosnia and Herzegovina dates back to the Illyrian period and the Thracians who introduced grapevine seedlings to the Balkans.

When talking about the history of winegrowing in BiH, it is important to mention that its borders used to encompass a much broader area than today. Namely, the Medieval Bosnia was once, without the later adjoined southern part (Hum), a distinguished winegrowing and wine producing region. Almost every aristocratic family had their own vineyards throughout the Middle Ages. This is clearly evident in the first detailed cadastral records dating back to the 15th and 16th century. With the arrival of the Turks, and the Islamization process of Bosnia, this type of production gradually decreased and eventually died out.

There are many reasons for the disappearance of the grapevine in Bosnia, the biggest one being the result of war as grapevine culture requires a high degree of human engagement.

Presently, the production of wine in the region is limited to river basins of the rivers Neretva and Trebišnjica, corresponding to the Herzegovina winegrowing region including Mostar, Lištica and Jablanica vineyards.

Towards the end of the 19th century, with the first wine exports to the Western Europe, wine business becomes a significant source of income in Herzegovina, and this trend continues with market conquering all over the world.

Wine business in Herzegovina has had its ups and downs, but it has never stopped being the main agricultural branch, and one could say, a lifestyle of the local people.

Herzegovinian winemakers aspire to be recognized for their Žilavka and Blatina as unique grape varieties in the world of wine and to present themselves to the world through the wine that captures the savour of the soil and the fervency of the Herzegovinian sun.

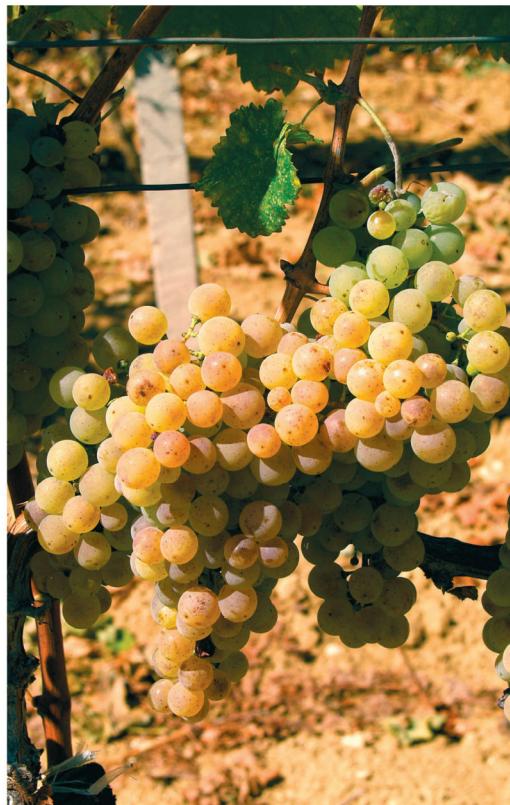

Žilavka

Podrijetlu imena Žilavka teško je dati točan odgovor. Najvjerojatnija je pretpostavka da njeno ime simbolizira fine žilice koje se naziru u doba pune zrelosti grožđa u bobici kroz njenu debelu ali prozirnu kožicu. Dodatak koji se pridaje imenu - hercegovačka, kao da hoće reći da nigdje nije tako raskošna, nježna, blagotvorna i izdašna da nadoknadi brigu i trud vinogradara kao u Hercegovini u kojoj je nastala, formirala karakteristike, prilagodila se i poistovjetila sa sunčanim i kršnim ambijentom Hercegovine.

Od kultivira Žilavka proizvode se kvalitetna, a s probranih položaja (vinograda) vrhunska vina, vrlo često s dodatkom do 15 % Krkošije i Bene, također autohtonih kultivira (sorti) Hercegovine.

Vino Žilavka svatko ponašob doživljava na svoj način. Ono privlači ljubitelje dobre kapljice svojom posebnosti i osebujnošću, specifičnim mirisom, zaobljenošću, snagom karakterističnom za južna vina. Žilavka nosi pečat Hercegovine.

Divna kristalno čista, zelenkasto žuta boja, specifična aroma, skladan odnos alkohola i kiselina i bogat ekstrakt, izdvajaju Žilavku iznad drugih vina. Žilavka je jako vino s 12 – 14 vol. % alkohola, 5 – 6 g/l ukupnih kiselina, uz ukupan ekstrakt 20 do 27 g/l. Svoju pravu punoču i prepoznatljivost postiže dužim odležavanjem u butelji. Hercegovci je piju uz janjetinu lešo ili pečenu na ražnju, zatim uz jegulju i uz druge slatkvodne i morske ribe, te uz sir iz »mišine« (mijeha) i pršut. Posluživati je obvezno rashlađenu na temperaturi 10-12 °C.

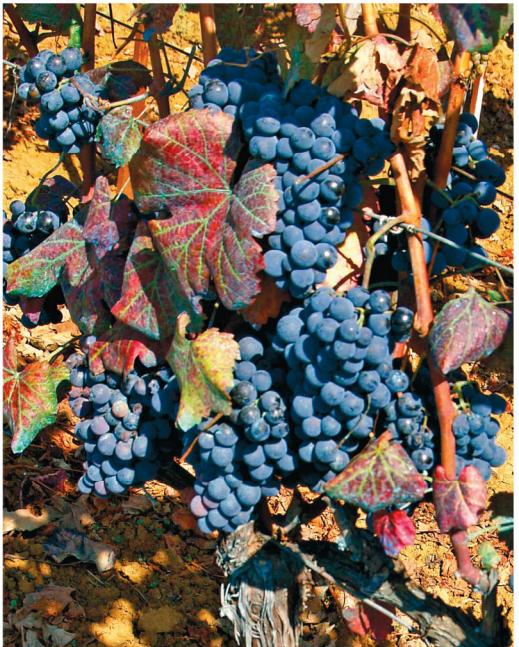

It is very difficult to give an exact answer about the origin of the name Žilavka, but it can be logically assumed that its name symbolizes fine veins, visible in the period of the full maturity of grapes in the berry, through its thick but transparent skin. Its attribute, „hercegovačka“ seems to want to express its unique grandeur, delicacy, boon , and abundance, as if to redeem the concern and effort of the winegrowers. It also symbolizes the region of Herzegovina, where it grew, formed its characteristics, assimilated and identified with the sunny and karst ambience of Herzegovina.

The variety of Žilavka gives quality wines, while premium quality wines are produced from grapes growing at selected locations (vineyards), very often with the addition of 15% of Krkošija and Bena, which are also autochthonous grape varieties of the region of Herzegovina.

Everybody experiences the Žilavka wine in a personal and individual way. It attracts wine lovers with its singularity and peculiar qualities, particular fragrance, roundness, and strength typical of southern wines. It bears the impression of Herzegovina. The beautiful crystal clear yellowgreen hue, specific aroma, harmonious proportion of alcohol and acidity, and a rich extract, distinguish Žilavka from all other wines. It's a strong wine with 12 to 14 % of alcohol, 5 to 6 g/l of total acidity, with a total extract of 20 to 27 g/l. It gains its genuine plenitude and features the longer it is aging in the bottle. Inhabitants of Herzegovina drink Žilavka with boiled or grilled lamb, eel and other fresh-water and sea fish, as well as with cheese from sheep skin sack, and ham. It is best served refrigerated at 10 to 12 °C.

Blatina

Blatina je autohtoni kultivar (sorta) Hercegovine. Ona ima funkcionalno ženski cvijet (autosterilan) zbog čega se u nasadima uvijek uzgaja s drugim kultivarima (sortama) kao što su Alicante bouschet (Kambuša), Merlot i Trnjak koji su ujedno i oprašivači Blatine. Zbog kiša u vrijeme oplodnje, znade podbaciti rodom pa je nazivaju „praznobaćom“ Blatina je kvalitetno a s probranih položaja vrhunsko suho crveno (crno) vino proizvedeno od istoimene sorte grožđa uz dodatak do 15 % sorti oprašivača. To je snažno i svježe suho, crveno vino s 12-13.5 vol. % alkohola, 5-7 g/l ukupnih kiselina, 25-32 g/l ekstrakta. Boje je tamno rubin crvene, prepoznatljive svojstvene aromе, puna i harmonična okusa.

Kao južno vino posjeduje zadovoljavajuću koncentraciju kiselina. Za vino je dobro da odleži koju godinu u drvenim bačvama, čak štoviše, kakvoća mu raste do pet godina starosti. Preporuča se piti uz jača jela od mesa, divljaci, a posebno uz pečenja, riblje paprikaše, te uz nareške od goveđeg pršuta. Pije se polako, čisto, temperirano 18-20 °C iz lijepo oblikovanih čaša, u seoskom ambijentu i iz drvene bukare.

Čuvajte se njezine snage! U njoj je kondenzirano sunce i sabrana sva hercegovačka ljetna žega.

Blatina is an autochthonous grape variety of Herzegovina. It has a functional female flower (autosterile), and for that reason it is always cultivated in plantations with other varieties such as Alicante bouschet (Kambuša), Merlot, and Trnjak, which at the same time pollinate Blatina. During the period of insemination, because of the rain, it can fail in giving fruits, and it is then called „praznobaća“ (emptybarrel). Blatina is a quality and in specific locations a premium quality dry red wine, produced with the variety of grapes that has the same name, with 15% addition of pollinating varieties. It's a strong and fresh dry red wine with 12 to 13.5 % of alcohol, 5 to 7 g/l of total acidity, 25-32 g/l of extract. It has a dark ruby red colour, particular and characteristic aroma, as well as a full and harmonious taste. As a southern wine it has a satisfying concentration of acid. It is good to let it age for several years in wooden barrels, even more, the quality is the highest, they say, with up to 5 years of aging. It is recommended to drink Blatina with intensively flavoured meals, meat from game, especially roastmeat, fish stew, and beef ham. It is drunk slowly, undiluted on 18 to 20 °C, from nicely shaped glasses, and in a rural ambience from a wooden jug. Beware of its strength! It condenses the sun and all of the Herzegovian summer heat.

Ostale sorte

Kambuša je crna vinska sorta jako obojenog soka i spada u kategoriju bojadisera. Ova odlika joj osigurava mjesto među pratećim crnim vinskim sortama i koristi se kao komponenta vinima kojima ove odlike nedostaju. Čokot joj je srednja jakosti a mladice dosta duge i žuto smeđe obojene. Grozd je srednje veličine, čunast i zbijen težine 150 do 200 g. Velike je i redovite rodnosti te osrednje kvalitete.

Merlot, francuska sorta je zahvaljujući jako dobroj rodnosti i otpornosti na niske zimske temperature, te otpornosti na gljivična oboljenja dosta raširena u svijetu. Srednje je bujniji, mladice su srednje debele, internodiji su dugački i smeđe crvenkaste boje. Cvjet je hermafroditan, grozd je srednje velik, rastresit i piramidalnog oblika. Vina ove sorte su bogata alkoholom, ukupnim kiselinama, boja je rubinsko crvena s aromom šumske maline.

Cabernet, također francuska vinska sorta, koja je u posljednje vrijeme prisutna i u Hercegovini. Podjednako uspješno se uzgaja na dubokim i suhim tlima te nema posebnih zahtjeva za rezidbu. Dobre je otpornosti na gljivične bolesti. Ova sorta daje dobar i redovit rod sa sadržajem šećera u moštu do 23 %, i kiselinama od 7 g/lit. Vino ove sorte je rubinsko crveno, punog i skladnog okusa s prepoznatljivim bukeom koji je kod vinoljubaca dosta cijenjen.

Chardonnay je vinska sorta bijelog grožđa. Uža joj je domovina pokrajina Champagne i Burgundija. Otporna je na sivu pljesan. Zbog svoje stalne rodnosti i zbog kakvoće vina dobivenog preradom njenog grožđa, proširila se manje-više po svim kontinentima. Zbog snažna rasta odgovara joj dugi rez. Bobice su joj ugodno kisele i pune soka koje moraju neposredno poslije berbe biti vinificirane. Vina chardonnay su izvrsna osnova za proizvodnju pjenuša.

The other cultivars

Kambuša is a red grapes variety of strongly colored juice and it belongs to the group of gamay wines. This feature ensures its place among the accompanying red grape varieties and it is used as an additional component in the wines which lack this feature. The vine is not very strong and the cuttings are yellowish brown and quite long. The grape cluster is of medium size weighting 150 – 200 grams. It has enormous and regular fertilization and the wine is if medium quality.

Merlot is a French grape variety widely spread in the world thanks to its good fertilization and resistance to low winter temperatures and fungal diseases. It is of medium density, the cuttings are of medium thickness, internodes are long and brownish red. The flower is hermaphrodite, the grape cluster is medium size and pyramidal. Wines are rich in alcohol, total acidity, and ruby red color with the raspberry aroma.

Cabernet Sauvignon a widely spread French variety cultivated in Herzegovina since recently. It gives equal yield when grown on both deep and dry soils and it does not require special pruning. It is highly resistant to fungal diseases. This variety gives good and regular yield with the must sugar up to 23% and 7 g/lit total acidity. Wine has a ruby red color; it has full taste with easily recognizable bouquet which is highly appreciated by the wine lovers.

Chardonnay is a white grape variety. It originated in the Champagne, Burgundy. It is resistant to powdery mildew, it should be deeply pruned. Due to its regular fertility and the quality of wine from its grapes, it has been spread all over the world. Its berries are pleasantly bitter and full of juice but have to be vinified immediately after being picked. Chardonnay wines are important component of many sparkling wines.

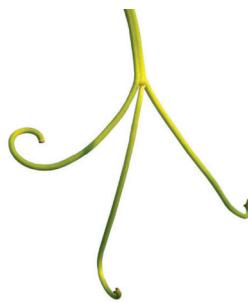

Vranac

Vranac je najpoznatija crnogorska crna vinska sorta koja je raširena i u Hercegovini, Dalmaciji i Makedoniji. Grozd je velik valjkastog oblika, rastersit i duge peteljke. Bobice su velike i okrugle a kožica je tamno plava, jako obojena, tanka i glatka. Prosječna težina grozda je 150 – 350 g. Ovo je sorta dobre i redovite rodnosti i grožđe nakupi visok sadržaj sladora od 22 – 25 % i kiselinama oko 6 g/l, tako da vino dobiveno od ove sorte sadrži od 12 – 13,5 posto alkohola i ugodna je okusa. Mlada vina od vranca trpka su, napadna mirisa, gotovo divlja, a pripitomit će ih odležavanje u drvenim posudama, bilo u barriqueu, bilo u velikim bačvama. Dobro odnjegovani vranci snažni su i doslovce napune usta, a u berbama koje im daju više kiselina to mogu biti i vina prikladna za višegodišnja odležavanja.

Vranac

Vranac is the most famous Montenegrin grape variety which is also widely spread in Herzegovina, Dalmatia and Macedonia. Grape clusters are big, egg shaped with long stem. The berries are big, round and the skin is of a rich dark blue color, thin and smooth. An average grape cluster weights 150 – 350 grams. This variety has good and regular fertilization with the amount of sugar 22 – 25 % and 6 g/l of acidity, so the wine has 12 – 13,5 % alcohol and it has a very pleasant taste. Young wines made of the *vranac* variety of grapes are tart, with intensive aroma, almost wild. They are tamed by aging in wooden barrels, barrique or other types. Well aged *vranac* wines are strong and full bodied. Vintages rich in acids may produce wines suitable for years long aging.

Čitluk

www.citluk.ba

grad grožđa i vina

K

ršovita visoravan Brotnjo ili općina Čitluk je kolijevka vinogradarstva i vinarstva Bosne i Hercegovine. Skoro svaka obitelj u ovoj općini posjeduje vlastiti vinograd i vlastita vina. U pravom smislu riječi u ovoj idiličnoj Općini, gospodarski jednoj od najrazvijenijih u Bosni i Hercegovini, posebno je izražena tradicionalna veza između čovjeka i vinove loze. Ovdje se loza obrađuje stoljećima i piće najbolje vino Žilavka i Blatina, a gosti se dočekuju iz ljubavi.

Vinska cesta Hercegovine sa sloganom „*s vinom kroz vrijeme*“ je otvorila vrata svim ljubiteljima vina i tradicionalnog načina života. Pored hotela, sportskih objekata, vrhunskih restorana, muzeja i galerija stoje Vam na raspolaganju četrnaest broćanskih vinskih podruma, gdje ćete degustirati najbolja bosanskohercegovačka vina, upoznati radišne stanovnike i njihov način života te kulturno i povjesno naslijeđe ovoga kraja. Domaćin će Vas počastiti tradicionalnim jelima koja u sebi nose mirise davnih vremena.

Ako iznad svega poštujete prirodu i iskreno druženje, ako tražite mir u idiličnim prizorima, ako želite uvijek spoznati nešto novo i odmoriti se, ako uživate u ispijanju kapljica vrhunskih vina i kušanju tradicionalnih jela onda je Broćanska vinska cesta prava cesta koja će Vas „*provesti kroz vrijeme*“ s čašicom vrhunskog vina u ruci.

The karst plateau Brotno or the Municipality of Čitluk is the winegrowing and winemaking cradle of Bosnia and Herzegovina. Almost every family in this municipality has its own vineyard and produces its own wines. In this idyllic municipality, which is also one of the most developed municipalities in Bosnia and Herzegovina, the traditional bond between a man and grape vine is especially noticeable in the true sense of the word. In this area grape vine has been cultivated for centuries, the best wines Blatina and Žilavka have been consumed for equally as long, and guests have always been welcomed with love.

Wine Route Herzegovina, with its slogan "with wine through time", has opened the door to all those who admire wine and a traditional way of life. In addition to hotels, sports facilities, top-quality restaurants, museums and galleries, you also have at your disposal fourteen Brotnjo wine cellars where you can taste the best wines from Bosnia and Herzegovina, meet the hard-working locals and familiarize yourself with their way of life, the cultural and historical heritage of this area. Your hosts will offer you fine traditional cuisine carrying the scents of ancient times.

If you admire nature and honest heart company above all, if you are looking for peace surrounded by idyllic scenery, if you are craving for discovering new things and having a good rest, if you enjoy tasting fine, quality beverages and traditional meals, then the Brotnjo Wine Route is the right road for you to take. It will lead you through time with a glass of excellent wine in your hand.

Kameni vinogradi / Stony vineyards - Blizanci

Vinarija Čitluk / Wine-cellar
Tel.: 036 642 400
www.hercegovinavino.com

Vinograd u kamenu je jedinstven vinograd u svijetu smješten u južnom dijelu Brotnja. Jedinstven je po tomu što je kamena pustinja pretvorena u oazu obilja lože i grôzda. Plantacija zauzima površinu od 100 hektara. Na njoj se uzgaja autohtona vinska sorta Žilavka. Zbog sunca, kamena i sustava napajanja vodom, Žilavku dobivenu s ove plantaze karakterizira visok sadržaj šećera. Od nje se proizvodi čuveno "Kameno vino".

Stony vineyard - the world's unique vineyard is situated in the southern part of Brotnjo. Its uniqueness comes from the fact that it turned from a stone desert in a oasis of luxuriance and grapes. The plantation covers a surface of 100 hectares. Autochthonous wine variety Žilavka is grown on it. Because of the combination of sun, stone, and the irrigation system, Žilavka gained in this plantation is characterized by a high level of sugar out of which the famous "Stony wine" is produced.

Vinski muzej / Wine museum - Gradnici

Župni ured / Parish office - Gradnici
Tel.: 036 642 006
GSM: 063 437 282
E-mail:marinko.sakota@tel.net.ba.

U župi Gradnici, nalazi se i najstariji sačuvani vinski podrum u BiH. Potpuno pod zemljom sagradio ga je davne 1855. godine fra Petar Bakula. Podrum je obnovljen i pretvoren u muzej. Danas podrum služi kao muzej i u njemu se nalazi vinoteka u kojoj su izložena sva broćanska vina.

In the Gradnici parish there is the oldest preserved wine-cellars in B&H. It's completely under ground and it was built in 1855 by fra Petar Bakula. The cellar has been renovated and turned into a museum. Nowadays, the cellar is used as a museum with a wine club in which all Brotnjo wines are displayed.

Svetište Kraljice Mira / Shrine of the Queen of Peace - Međugorje

Župni ured / Parish office Međugorje
Tel.: 036 651 333
Faks: 036 651 444
www.medjugorje.hr

Medjugorje je trenutno jedno od najvećih marijanskih svetišta u svijetu. Ukažanjem blažene djevice Marije 24. 06. 1981., ovo je mjesto postalo odredište hodočasnika sa svih strana svijeta. Osnovna poruka Medugorja je mir. Svaki hodočasnik redovito posjeti Župnu crkvu Sv. Jakova, Brdo ukažanja, Križevac, Vrt Sv. Franje i Canacolo. Najznačajniji događaji kroz godinu su: Godišnjica ukažanja, Festival mladih, proslava Velike Gospe, misa na Križevcu, proslava Uskrsa, Božića i Nove godine.

Medjugorje is currently one of the biggest Marian shrines in the world. With the apparition of the Blessed Virgin Mary on 24th June, 1981, this place has become a destination of the pilgrims from all over the world. The fundamental message of Medjugorje is peace. Every pilgrim visits the Parish church of St. Jacob, The Hill of Apparition, Križevac, Garden of St. Francis, and Canacolo. The most important annual events are: Apparition anniversary, Youth festival, Assumption, Mass on Križevac, Easter, Christmas, and New Year's Eve celebration.

Galerija fra Didaka Buntića / Gallery of fra Didaka Buntića - Gradnici

Župni ured / Parish office - Gradnici
Tel.: 036 642 006
GSM: 063 437 282
E-mail:marinko.sakota@tel.net.ba.

U drevnoj župi Gradnici, u općini Čitluk, u najstarijoj broćanskoj crkvi i školi nalazi se galerija fra Didaka Buntića. Rođen 1871. godine, kao Franjo Buntić, Fra Didak je bio svećenik i veliki hercegovački prosvjetitelj svoga vremena. Također, bio je narodni zastupnik i graditelj crkava i napokon bio je i umjetnik - slikar. Većina njegovih sačuvanih radova se nalazi u ovoj galeriji, kao i spisi Matice iz toga vremena.

The gallery of Fra Didak Buntić is situated in the ancient parish of Gradnici, Čitluk municipality, in the oldest Brotnjo church and school. Born in 1871 as Franjo Buntić, Fra Didak was a priest and a great Herzegovinian enlightener of his time. Also, he was a representative of the people and a church builder, and after all, an artist - painter. Most of his preserved works are displayed in this gallery, as well as documents of Matica from that period.

Upodrumu AG utemeljenom prije 150 godina, uvijek je na prvom mjestu, kad je o grožđu i vinu riječ, bila ljubav. Kako se s ljubavlju obradivao vinograd, tako se s ljubavlju osluškivalo vreme mladog mošta, uređivale bačve, podešavala temperatura njemu potrebna..., jer riječ je o jedinstvenom procesu - sa zemlje obrati najbolje, u bačvama proizvesti najkvalitetnije! Žilavku, Blatinu, Rosse, barrique, a kao dio podrumske proizvodnje i lozu orahovaču, medovaču i šipkov liker.

Podrum AG - sunce iz vinograda ponovno rođeno u bačvama.

For the AG wine cellar, founded 150 years ago, love has always come first when grapes and wine are concerned. With the same loving manner, as in the land cultivation, fermentation of the young must is always carefully observed, barrels thoroughly arranged, the right temperature set up..., because here we are talking about a unique process - choosing the best from the land and producing the best quality in the barrels! Apart from Žilavka, Blatina and Rose Barrique, the cellar also produces walnut brandy, honey brandy and pomegranate liqueur. AG wine cellar - sun from the vineyards reborn in the barrels.

Prava ljepota navedenih Andrijinjih vina ne otkriva se samo čitanjem njihovih opisa nego kušanjem i umjerjenim pijenjem. Da bi to doživjeli dodite u obiteljske PODRUME ANDRIJA nadomak Gospina svetišta u MEDUGORJU.

Čorića obiteljsko stablo, unatoč teškoj narodnoj povijesti, dokumentirano se prati kroz tri stoljeća (oko 1740.). Uzgoj vinograda i proizvodnja vina uvek je bila obiteljska tradicija Čorića. Stari podrum i sada još sačuvan kao obiteljski muzej i ostanak nekadašnje turske kule sazidane još u 17. stoljeću, tako da je već davnje slavio 350. rođendan. Zanimljivo je i sljedeće: Andrijin otac Šimun Čorić (1883-1938) bio je dvanaestak godina u vojnoj službi i time zaslužio veliko imanje. Njegov sin Andrija, osamostalio se 1938. i nastavio tu tradiciju sa suprugom Stojom. Dok su se prije u ovom kraju nudila točena vina, Andrija i Stoju su već 60-tih godina prošlog stoljeća počeli prvi u Hercegovini saditi lozu na široku sadnju i "flaširati" vino. Nastavljajući obiteljsku tradiciju obitelj Andrije Čorića odlučila je izgraditi novi podrum, čiji je kapacitet postigao već polumilijunsu razinu. Uz najsvremeniju opremu i stručnost dokazanih enologa postiže velike rezultate u proizvodnji kvalitetnih, vrhunskih, prigodnih i arhičkih vina, što potvrđuju mnoge nagrade sa međunarodnih sajmova.

Agroturizam - seoski turizam od 1997 godine. Piknik u vinogradu, sportske aktivnosti, ručkovi i večere, smještaj za 20 osoba u 4 apartmana, obilazak starog podruma i obiteljskog muzeja te znamenitosti Paoče.

The beauty of Andrija wines is not discovered by only reading its descriptions, but also by tasting and moderate consumption. Viticulture and wine producing has always been a family tradition of the Čorić family. Old wine cellar and remains of an old Turkish tower built in the 17th century have been preserved and converted to a museum which celebrated its 350th anniversary some time ago. As a curiosity, Andrija's father, Šimun Čorić (1883-1938) served military for over ten years and was awarded a large estate for its service. His son Andrija Čorić, took over the estate in 1938 and kept the tradition alive together with his wife Stoj. Wines produced in the region had been sold in bulk, but Andrija and Stoj have been the first producers in Herzegovina who started planting wide groves and selling wines in bottles. Continuing the family tradition, Čorić family constructed a new, half million litres capacity wine cellar. Thanks to the modern equipment and expertise of experienced oenologists, the winery achieves great results in production of quality, premium quality, commemorative and archive wines illustrated by a number of awards received at international wine fairs.

Agro-tourism, rural tourism since 1997. Picnic in a vineyard, sport activities, lunch and dinner, accommodation for 20 persons in 4 apartments, tour of the old wine cellar, family museum and other attractions in Paoča.

Obiteljski podrum Brkic
 Josip Brkic
 Wine cellar Brkic

U1979. godini obitelj Brkic osnovala je prvi moderni vinski podrum u BiH. Naša filozofija je proizvodnja prirodnih, organskih vina u ograničenim količinama. Proizvodimo vina isključivo od hercegovčkih autohtonih sorti grožđa, žilavke i blatine. U proizvodnji vina koristimo različite tehnologije prerade, s ciljem da pokazemo cijelu lepezu mogućnosti koje nam daju naše autohtone sorte. U ponudi našeg podruma imamo svjeza, mlađa vina iz prošle berbe, Žilavku i Blatinu Brkic, zatim odležala bijela i crvena vina, koja prvi put izlaze na tržiste nakon dvije godine odležavanja u drvenim bačvama (Greda i Plava Greda) i vina proizvedena po biodinamičkim principima (Mjesecar i Crveni Mjesecar). Vina prodajemo na domaćem(70%) i na tržištu SAD-a i EU(30%). Pored vina, također pravimo liker od meda, višnje, oraha, smokve, travaricu, te lozu. Posljednjih godina intenzivno radimo na vinskom turizmu, gdje u našem podrumu i kušaonici vršimo prodaju i degustacije za turiste koji navrate do nas vodenim Vinskom cestom Hercegovine.

In the year 1979 family Brkic founded the first modern wine cellar in BiH. Our philosophy is to manufacture natural, organic wines in limited quantities. We produce wines exclusively from Herzegovian indigenous grape varieties, Žilavka and Blatina. In the production of wine we use different processing technologies, in order to display the full range of possibilities that give us our indigenous varieties. In the offer of our cellar we have fresh, young wine from the last harvest, Žilavka and Blatina Brkic, then aged white and red wines which are the first time out on the market after two years of aging in wooden barrels (Greda and Plava Greda) and wineS that are produced by Biodynamic principles (Sleepwalker and Red Sleepwalker). We sell our wines on domestic market (70%) and on the US market and the EU (30%). Besides wine, we also produce honey liqueur, cherry liqueur, walnut liqueur, fig liqueur, herb and vines. In recent years, we are working intensively on wine tourism. In our cellar and tasting room we sell and have degustations for tourists who visit us guided by the Wine road of Herzegovina.

Vrhunska Vina / Premium quality wines:
Žilavka Brkic, Blatina Brkic, Greda, Plava Greda, Mjesecar, Crveni Mjesecar - 0,75 l

GPS: 43° 13' 29.1"N, 17° 41' 33.0"E

Najveća vinarija u BiH, prerađivačkog i smještajnog kapaciteta od 110.000 hl. Vinarija posjeduje najsvremeniju opremu za uvijanje grožđa, uređaje za hladnu maceraciju, hladnu i hlađenu fermentaciju, te inox cisterne, hrastove i barrique bačve za odležavanje vina. Također ima i najveće površine pod vinogradima koji se prostiru na oko 300 ha na pet vinogradarskih polozaja, gdje su posadeni uglavnom autotoni i udomaćeni kultivari Žilavka, Blatina, Trnjak, Plavac mali i Vranac. U sklopu degustacije u Čitluku je i posjeta najvećoj plantazi u državi. To su Kameni vinogradi, površina od 100 ha, jedinstvena lokacija gdje je kamena pustinja pretvorena u zelenu oazu. Podignuta je početkom osamdesetih godina prošlog stoljeća.

ROMANCA, eno-gastronomski kompleks - vinski podrum s kušaonicom, restoran i vinoteka, je objekat nastao kao logičan sljed razvoja kompanija Vinarija Čitluk/ Hercegovinavino, te pružanja usluga u sklopu turističkog projekta „Vinska cesta“. To je mjesto za promociju, kušanje i uživanje u vinima Vinarije Čitluk. Udaljen je 10 minuta autom od centra Mostara u sred plantaze Konjusi, okružen vinogradom, maslinama i voćnjakom.

The Čitluk Winery is the biggest winery in B&H with a keeping and processing capacity of 110 000 hl. The winery owns over 300 ha of its own vineyards, consisting mainly of Žilavka, Blatina, Trnjak, Plavac and Vranac, recently credited with the plantations of two of the most famous world cultivars, Chardonnay, Cabernet Sauvignon and Merlot. Herzegovinavino d.o.o. Mostar, a strategical partner of the Čitluk Winery, owns 100 hectares of vineyards, mainly Blatina, Žilavka, and Vranac. The overall quantity of grapes from these vineyards is turned into wine in the cellar of the Čitluk Winery with the latest winemaking equipment - devices for cold maceration and fermentation, stainless steel tanks, oak barrique barrels for aging wine.

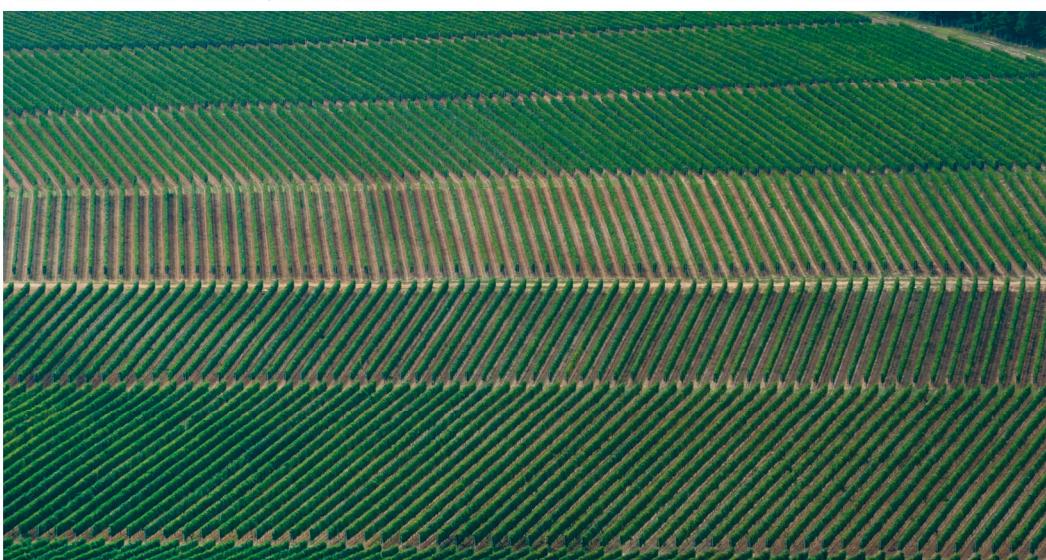

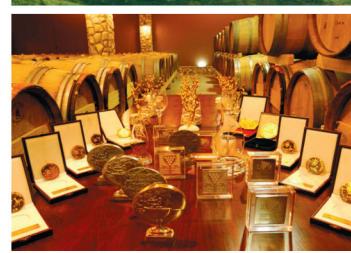

ROMANCA, Oeno-gastronomic complex - wine cellar with a degustation space, restaurant and a wine bar was established as a result of development of Vinarija Čitluk/Hercegovinavino, and introduction of services offered within tourism project "Vinska cesta" (Wine route). It is a space for promotion, tasting and enjoyment of wines produced by Vinarija Čitluk. It is a ten minute drive from the centre of Mostar, in the middle of Konjusi plantation, surrounded by vineyards, olive groves and orchards.

Vina / Wines

Barrique vina (5 vrsta), Vrhunska vina (8 vrsta), Kvalitetna vina (7 vrsta), Stolna vina (4 vrste). Najpoznatija vina iz ponude su: Kameno, Žilavka Mostar i Tvrtko (bijelo,suhu), te Blatina de Broto, Vranac i Trnjak (crveno, suho). Priča vinarije Marijanović, priča je o obitelji, tradiciji i ljubavi prema vinu. Smješteni smo u mirnom hercegovačkom selu Služanj, nedaleko od Čitluka i Medugorja, u kojem već 4 generacije nježujemo dvije autohtone hercegovačke sorte (Žilavku i Blatinu), a u novije vrijeme i dvije francuske sorte (Syrah i Cabernet Sauvignon).

Vino svoju čaroliju najbolje pokazuje u svom rodnom mjestu, podrumu. Da bi potpuno uživali u vnu trebate o njemu što više znati. Nije nam cilj da vino samo pijete, nego da u njemu i uživate. Svaka kapljica ispijena s užitkom bit će za vas najbolja nagrada za sav trud. Zbog toga želimo uspostaviti bliži kontakt s ljubiteljima vina i s onima koji će to tek postati.

Kroz vodene degustacije, uz pomoć naših enologa, upoznati ćete se s procesom nastajanja vina i osnovnim tehnikama degustacije vina.

Vodenje degustacija uključuje: obilazak vinograda, obilazak podruma, degustacija vina (min. 3 vrste vina) i zakuska (po dogovoru). Osim vina, možete kušati razne likere i rakije. Naša se kušaonica nalazi u sklopu podruma i može primiti šezdeset osoba. Užitak vodenih degustacija vina u neposrednoj blizini nastajanja, iz ruku njegova tvorca, iskustvo je koje ne smijete propustiti.

The story about the winery Marijanović is the story about family, tradition and love for wine. Our winery is located in Služanj, a peaceful Herzegovinian village, not far away from Čitluk and Medjugorje. For the past four generations we have been nurturing two autochthonous types of vine (Žilavka and Blatina), and lately two French types as well (Syrah and Cabernet Sauvignon).

Wine tourism: Wine works its magic best of all in its birth place - the cellar. One should know as much as possible about wine in order to enjoy it completely. It is not our intention for you only to drink wine, but to enjoy it as well. Every sip you drink with pleasure will be the best prize for our work. For this reason we aim to establish a closer contact with wine lovers and those who will become its lovers. You will be guided through wine tastings and will be introduced to the process of making wine and basic techniques of wine tasting with the help of our wine experts.

Guided wine tasting includes: Visiting the vineyards, Visiting the wine cellar, Wine tasting (minimum three types of wine) and Refreshment (by arrangement). In addition to wine tasting, you can taste various liqueurs and brandy. Our tasting room is located in the wine cellar and it can accommodate sixty people. The pleasure of wine tasting in close proximity of its development, from the hands of its creator, is an experience you can not let pass.

Obitelj Buntić proizvodi vino stoljećima. Već od 1921. godine bavi se ozbiljnom proizvodnjom. Za to vrijeme je proizvedena značajna količina od 10 000 l. Druga značajna godina je 1972., kad je prvi put registrirano kao zanimanje proizvodnja vina. Tad se počinje pakirati vino u staklene boce s etiketom Podruma Buntić. 1994. je konačno registrirana proizvodnja i punjenje Žilavke i Blatine kao vrhunskog zaštićenog proizvoda. Pored vrhunske Žilavke i Blatine proizvodi se Loza, Rose i Blatina barrique. Ove vrhunske proizvode možete pronaći u svim bolje opremljenim prodajnim objektima, vinotekama, restoranima kako u zemlji tako i u inozemstvu. Danas u uspešnoj proizvodnji i prodaji sudjeluju tri generacije obitelji Buntić.

The Buntić family has been producing wine for centuries. Since 1921 their production has reached a professional level. During that period, a significant quantity of 10,000 l has been produced. Another important year is 1972, when for the first time winemaking was registered as a profession. That's when wine is bottled with the Buntić Cellar label. In 1994 the production and bottling of Žilavka and Blatina as premium quality protected products were finally registered. Besides the premium quality Žilavka and Blatina, other products like Loza (Grappa), Rosé, and Blatina barrique are produced. These high quality products can be found in all well-equipped stores, wine boutiques, and restaurants, both in our country and abroad. Nowadays, three generations of the Buntić family participate in the successful production and sales.

Jedan od pionira vinarstva u Hercegovini. Trideset i više godina proizvodi vino u buteljama, ja danas puni i pakira čuvenu Žilavku i Blatinu. Obiteljska tradicija proizvodnje grožđa i vina se stvorila iz ljubavi. Proizvodnja je čisto ekološka pa je zato cijenjena i tražena diljem Europe.

One of the pioneers in winemaking in Herzegovina with bottled wine production for over 30 years, presently, bottling the well-known Žilavka and Blatina from this region. Being a family tradition, grapes and wine production is done with love and pleasure. Since the production is strictly ecological, the wine produced is appreciated and sought for all over Europe.

Najstariji proizvođač vina i rakije u Hercegovini.
Medu prvima, točnije 1982. godine, gradi modern podrum i registrira se kao proizvođač vina i rakije. Danas posjeduje oko 2 hektara vlastitih, suvremenih plantažnih vinograda. Unazad nekoliko godina među prvima je u Hercegovini zasadio vinograd sortom Cabernet sauvignon i Chardonnay, najpoznatijim svjetskim sortama od kojih je dobio istoimena vina izvrsne kakovocene.

Osim s vlastitih površina, Stojić otkupljuje Žilavku i Blatinu iz ponajboljih vinograda svojih susjeda. Podrum je moderan i klimatiziran. Oprenjen je najsuvremenijim strojevima za preradu grožđa, inox cisternama i badnjevima za fermentaciju, drvenim bačvama i barrique bačvicama. Sve posude imaju sustav hlađenja i grijanja prema potrebi. Proizvodnja bijelih vina obavlja se isključivo u inox posudama, a kod crvenih vina tiha fermentacija, čuvanje i njega odvija se u drvenim ili barrique bačvama.

He is the oldest producer of wine and brandy in Herzegovina. Among the first, in 1982, he builds a modern cellar and registers himself as a producer of wine and brandy. Currently, he owns 2 hectares of his own, modern plantation vineyards. Several years ago he was among the first in Herzegovina to plant a vineyard with Cabernet sauvignon and Chardonnay varieties, the most famous world varieties out of which he gains wines of great quality. Besides his own plantations, Stojić buys off Žilavka and Blatin from the best surrounding vineyards. The cellar is modern and air-conditioned. It is equipped with the latest machines for grapes processing, inox tanks and vats for fermentation, wooden barrels and small barrique barrels. Each of the vessels has cooling and heating systems. The production of white wines is done exclusively in inox vessels, while the red wines are fermented, aged, and kept in wooden and barrique barrels.

Vina / Wines
Vrhunská / Premium quality wines: Žilavka 0,2; 0,75 & 1 l, Blatina 0,2; 0,75 & 1 l, Žilavka barrique 0,75 l, Blatina barrique 0,75 l

Onaj tko zna uživati svoje vino pokazuje umijeće življenja, a tko svoje vino ostavi u tišini dozrijevati dokazuje osjećaj za kvalitetu. Stoga je naš moto "Bođe manje ali ekološki kvalitetnije."

Kada se tome doda Terroir mesta Blatnica gdje se nalaze naši vinogradi, te Broćansko sunce koje ovdje ima poseban sjaj s ponosom možemo reći da su to temelji na kojima počiva naša vinarija.

Opremljena suvremenom tehnologijom, obiteljska vinarija je utkana u našu stoljetnu tradicijsku proizvodnju vrhunskih vina od autohtonih sorti Žilavka i Blatina. Pored vrhunskih vina Žilavka "MATA" i Blatina "MATA" posebnu pažnju zaslužuju naše rakije i voćni likeri.

Zadovoljstvo nam je pozvati Vas na kušanje naših proizvoda, upoznavanje s našom tradicijom i proizvodnjom, te razmjenu naših i Vaših iskustava.

The one who knows to enjoy his wine shows the art of living, and the one who leaves his wine in silence to ripen demonstrates a sense for quality. So our motto is "Better less, but with better ecological quality."

When you add the Terroir of the place Blatnica where our vineyards are and Brotnjo sun which here has a special glow, we can say with pride that these are the foundations on which rests our winery. Equipped with modern technology, a family winery is woven into our centuries-old traditional production of premium wines from indigenous varieties Žilavka and Blatina. Next to the top wines Žilavka "MATA" and Blatina "MATA" special attention deserve our brandies and fruit liqueurs.

It is our pleasure to invite you to taste our products, meet our tradition, production and also to exchange our and your experiences.

Mostar

www.mostar.ba

grad koji se "svjetlom stoljećima budi"

M

ostar je glavno kulturno, političko i finansijsko središte Hercegovine. Već na prvi doživljaj ovog prekrasnog grada osjetit ćete mnoštvo različitosti koje ga čine posebnim. Njegova draž je u tome što je se u njegove ulice utkao duh različitih civilizacija koje su ovdje boravile, duh koji se osjeća u mnoštvu mladih gostoljubljivih ljudi kao i arhitektonskim zdanjima. Ovaj sveučilišni centar regije oduvijek je bio i ostao - grad mostova i grad mladosti. Čuveni nobelovac Ivo Andrić je napisao: „Kad čovjek prenoći u Mostaru, nije zvuk ono što ga ujutro budi nego svjetlost“. Mostar je grad cvijeća, zelenila i bezbroj puta opjevanog behara koji već u veljači zna procvasti i načiniti čudnovato lijepu i nestvarnu sliku koja nadahnjuje.

Mostar ima specifičnu i rijetko ugodnu mediteransku klimu. Udaljen je svega 60 km od Jadranskog mora. U gradu i njegovoj blizini se nalaze jedinstveni lokaliteti kulturno-povjesnog blaga od kojih treba posebno istaknuti kameni srednjovjekovni Stari most, koji dijeli lijevu i desnu obalu hercegovačkog bisera - rijeke Neretve. Pojedini povjesni ostaci svjedoče o kontinuiranom životu na ovom prostoru od pred antičkog vremena. Najstariji pisani dokument o Mostaru datira iz XV stoljeća.

Kao grad posjeduje kompletnu prostornu infrastrukturu, cestovni i željeznički promet i modernu zračnu luku. Mnoštvo prekrasnih parkova, sportskih terena, muzeja, galerija i klubova čine ga za život idealnim, ljudima nudi pozitivna ushićenja koja se dugo pamte.

The city of Mostar is the cultural, political and financial centre of Herzegovina. Already with the first encounter with this beautiful city, you will feel its diversity which makes it so special. Its charm rests in its streets interwoven with the spirit of many different civilizations which have dwelled here, the spirit felt in its numerous young and hospitable people and its architecture. This university centre of the region has always been and has remained the city of bridges and the city of youth.

Ivo Andrić, world famous Nobel Prize winner once wrote: "When you spend a night in Mostar, it is not the sound that wakes you up in the morning, but – the light". Mostar is the city of flowers and greenery, famous for its blossom, celebrated so many times by poets and poems, flowering sometimes as early as February and creating a strikingly beautiful and dreamy image that can offer only inspiration.

Mostar has a very particular and pleasant Mediterranean climate that can be rarely found elsewhere. It lies at a distance of only 60 km from the Adriatic Sea. In the city itself and in its vicinity there are many unique locations with historical and cultural treasures the most prominent being the Old Bridge, made of stone and dating back to the Middle Ages, which joins the left and the right bank of the Herzegovian pearl – the river Neretva. There is some historical evidence testifying to the fact that life has continued in this region since pre-historic times. The oldest written document mentioning Mostar dates back to the 15th century.

As a city, Mostar has a complete urban infrastructure, road and railway transport and a modern airport. A number of beautiful parks, sports terrains, museums, galleries and clubs make it an ideal place for living offering people positive excitement that stays in their memory for a long time.

Stari most / The Old Bridge - Mostar

Stari most u Mostaru simbol je grada Mostara izgrađen davne 1566. godine. To je jednoluka građevina koja spaja lijevu i desnu obalu rijeke Neretve. Raspon luka je 28,7 m a visina 21 m od ljetne razine rijeke. S njega se održavaju visinski skokovi u srpnju mjesecu svake godine. Upisan je na popis svjetske baštine UNESCO-a 2005. godine. Dolaskom na Stari most uživati će te u nezaboravnom pogledu na rijeku Neretvu i starine koje vas okružuju.

The Old Bridge in Mostar is the symbol of the City of Mostar built in 1566. It's a one-arch construction that bonds the left to the right bank of the river Neretva. The span of the arch is 28,7 meters long, and the height is 21 meters from the summer water level. A high-altitude diving competition is held here every year in July. It has been introduced in the UNESCO's list of world heritage in 2005. By coming to the Old Bridge, you will enjoy a memorable view of the Neretva river and the surrounding antiquities.

Stari Grad / Old Town - Mostar

Stari Grad u Mostaru je zanimljiv po svojim uskim uličicama punim života. U njemu se nalazi mnoštvo ugostiteljskih objekata i obrta s tradicionalnom ponudom. U njemu se također nalazi mnoštvo kulturno-povijesnih i vjerskih objekata kao što su Stari most, Kriva čuprija, Tabačica, Koski Mehmed - Pašina džamija, Hamam - gradsko kupatilo itd.

Mostar's Old Town is interesting for its lively narrow streets. There are a lot of catering facilities in it and handicraft shops with an array of traditional goods offered. In the Old Town there are a lot of cultural-historical and religious buildings such as the Old Bridge, the Crooked Bridge, Tabačica Mosque, Koski Mehmed- Pasha's Mosque, Tara and Halebjija towers, etc.

Izvor Bune / The source of river Buna - Blagaj

Ovaj izvor se nalazi 12 km jugoistočno od Mostara. Izvore ispod litice visoke više stotina metara. Iz izvora izlazi 43 kubika vode u sekundi. Buna je jedna od najčistijih rijeka u ovome dijelu Europe te je bogata ribom. Dolaskom na izvor moguće je upražnjavati piknik, šetnju, razgledanje kulturno-povijesnog nastijeda i lokalnu gastro ponudu.

This source is situated 12km south-east from Mostar. It wells under a cliff hundred meters high. 43 cubic metres of water per second come out from the source. The Buna river is one of the cleanest rivers in this part of Europe and very rich with fish. By coming to the source you can enjoy picnic trips, tracking, sightseeing of cultural-historical heritage, and tasting local gastro-offer.

Stjepan grad / Stjepan town - Blagaj

Srednjevjekovno zdanje - Stjepan grad, nastalo na kasnoantičkoj utvrdi ponad Blagaja koji je bio jedan od najvažnijih gradova u Hercegovini. Ovaj hercegovi grad je zapravo bio gradska palača, opasana tvrdim bedemima s nazubljenim vrhovima koji su i danas vidljivi. U njemu je stolovao Stjepan Vukšić Kosača pa je zbog toga i dobio ime Stjepan grad. Ovaj grad je bio okosnica političkih i vojnih turbulencija hercegove zemlje sve do 1473. godine kada ga je osvojila turska vojska te je postao sjedište i rezidencija kadije.

Medieval building - Stjepan town, built in the late antique fortress over Blagaj is one of the most important towns in Herzegovina. This herceg's town was actually a town's palace, enclosed in the hard walls with jagged peaks still visible. Stjepan Vukšić Kosača kept court in it, that's why the town was named after him. This town was the center of political and military turmoils of herceg's land until 1473, when it was conquered by the Turkish army and became the seat and residence of the cadi (oriental civil judge).

Manastir / Monastery Žitomislići

Ovaj pravoslavni manastir je izgrađen 1566. godine i jedan je od najznačajnijih pravoslavnih manastira Hercegovine iz 16. stoljeća, a posvećen je Blagovještenju Presvetе Bogorodice. Nalazi se južno od Mostara na putu Mostar - Čapljina. Manastir je moguće posjetiti uz najavu.

This orthodox monastery, built in 1566, was one of the most important orthodox monasteries of Herzegovina in the 16th century, and dedicated to the Annunciation of the most holy mother of God. It's situated south of Mostar on the Mostar - Čapljina road. The monastery can be visited with previous notification.

Stoljetna tradicija uzgoja vinove loze, proizvodnja grožđa i spravljanje vina, ljubav prema tom čarobnom napitku, te bogomljano hercegovačko podneblje preduvjeti su bez kojih Misno vino ne bi bilo to što jest. Vinar Zdravko Rožić nasljednik je obiteljske tradicije koju je opremljenio primijenivši najmodernija tehnička dostignuća u proizvodnji Misnog vina što ga čini prepoznatljivim.

Ovaj vinar proizvodi isključivo vrhunska vina Žilavku i Blatinu u strogo kontroliranim i ograničenim količinama. Brojna su priznanja i medalje kojima su se okitila vina Obiteljskog podruma Rožić kako na domaćim tako i međunarodnim natjecanjima. Zdravko Rožić posebno je ponasan na zlatnu medalju s vinskog sajma Vinovita u Zagrebu 2006. godine. Ova ocjena je dana po najstrožim kriterijima OIV-ea.

Ljepota ovog vina nije u pripovijedanju nego u kušanju, zato čaše gore i živjeli!

A centuries old tradition of winegrowing, production of grapes and winemaking, love for the magic beverage, and the God-sent Herzegovina climate are all prerequisites without which the Misno wine wouldn't be what it is. The winemaker Zdravko Rožić is the heir of the family tradition who enabled it by applying the latest modern technical achievements in the production of Misno wine, which makes it even more distinguishing. This winemaker produces exclusively premium quality Žilavka and Blatina wines in strictly controlled and limited quantities. The wines of the Family cellar Rožić have been awarded numerous acknowledgments and medals on both local and international markets. Zdravko Rožić is particularly proud of the gold medal from the wine fair Vinovita in Zagreb in 2006, being aware that this grade was given according to the most rigorous criteria of the OIV. The beauty of wine is in tasting, not in narrating, so glasses up and cheers!

Najmladi bh. vinar Velimir Ereš za kratko se vrijeme, u svega četiri godine, okitio s devet medalja na međunarodnim sajmovima od Zagreba, Splita, Mostara i Sarajeva. Podrum je nastao 2008. godine, a ideja se rodila dvije godine prije. Vinograd je posaden 2006. godine, nalazi na optimalnom položaju Vilinka, brdo na Sretnicama (Čitluk) na oko 400 metara nadmorske visine. Podrum Vilinka proizvodi Žilavku, Blatinu i Blatina Barrique. Što se tiče količine, baziramo se na kvalitetu, a s vremenom se planira doći i do 30 tisuća litara koliko je i kapacitet podruma. U Sklopu podruma nalazi se sala za degustaciju kapaciteta 40 osoba.

Byoungest winemaker, Velimir Eres, has in a short time, in just four years, won nine medals at international fairs in Zagreb, Split, Mostar and Sarajevo. The cellar was made in 2008, and the idea was born only two years before that. The vineyard was planted in the 2006, and is located at the optimal position of Vilinka, the hill of Sretnica(Citluk) at the altitude of about 400 meters. The Vilinka cellar makes Žilavka, Blatina and Blatina Barrique. As to the amount, we focus on quality, and we plan to reach up to 30 000 liters capacity, which is the capacity of the cellar. Within the wine cellar, there is a wine tasting room with the capacity of 40 people.

Čapljina

www.capljina.ba

ljepotica na četiri rijeke

G

rad i općina Čapljina utkani su u razvedene i pitome prostore donjeg toka Neretve. Okružuju ga kasnoantički objekti Mogorjelo i Gabela, egzotični krajolik Struga, drevni kameni Počitelj-nadaleko čuveni kompleks srednjovjekovne arHITEKTURE te Hutovo blato – jedan od najbogatijih rezervata ptica močvarica u Europi. Čapljina je, može se reći - mezimica voda, grad na četiri rijeke: Neretvi, Trebižatu, Bregavi i Krupi. Okolni reljef je ispresjecan različitim oblicima u kojima se nadopunjaju goli krš, riječni tokovi, kanjoni i klisure, vodopadi i blagi pejzaži, te zelena riječna dolina Neretve. Blizina Jadranskog mora i mediteranska klima stvaraju osnovne klimatske uvjete čapljinske regije koje su pogodni za uzgoj vinove loze te mediteranskoga voća i povrća. Danas, kao i stoljećima, Čapljina je mjesto poželjno za život.

The town and the municipality of Čapljina are interwoven into the well-indented and calm area of the lower river Neretva course. It is surrounded by Late Antique monuments Mogorjelo and Gabela, the exotic landscape of Struga, ancient Počitelj – the famous stone complex of the medieval architecture and Hutovo blato – one of the richest wading bird reserves in Europe.

One could say for Čapljina that it is a "fondling of waters" as it is located on four rivers: Neretva, Trebižat, Bregava and Krupa.

The surrounding relief is intersected with various shapes in which the barren karst, rivers, canyons and ravines, waterfalls and mellow landscapes, and the lowland and green Neretva valley complement each other. The vicinity of the Adriatic Sea and the Mediterranean climate create the basic climatic features of the Čapljina region, very suitable for growing grapevine and Mediterranean fruit and vegetables. Nowadays, as well as it has been for centuries, Čapljina is a desirable place to live in.

Mogorjelo / Mogorjelo

U neposrednoj blizini Čapljine smješteno je Mogorjelo. To je bila rimska Villa rustica. Taj spomenik spada među najljepša zdanja kasne antičke arhitekture u našem kraju. Predmeti nađeni u Mogorjelu potječu iz IV. Stoljeća. Sama Villa svojim bogatstvom, ljepotom i osebujnošću arhitekture predstavlja oazu vrednотa i ljepote, okruženu bogatom mediteranskom vegetacijom.

Mogorjelo is situated in the immediate vicinity of Čapljina. It was a Roman Villa rustica. This monument is among the most beautiful constructions of the late antique architecture in our region. Objects found in Mogorjelo go back to the 4th century. The Villa, with its luxuriance, beauty and peculiarity of architecture represents an oasis of values and beauties, surrounded by the rich Mediterranean vegetation.

Konjički klub / Equestrian club "Vranac"

Na lokalitetu povijesnog Mogorjela se nalazi konjički klub "Vranac" koji nudi posjetiteljima jahanje u prirodi, vožnju kočijom odnosnom fijakerom i šetnju s konjima uz rijeku Neretvu. Klub ima pet engleskih galoper, sedam domaćih rasnih konja te dva ponija za djecu. Klub je otvoren svakodnevno za posjetu i jahanje.

In the location of the historical Mogorjelo there is the equestrian club "Vranac" that offers to its visitors riding in the nature, carriage ride, and walk with horses by the Neretva river. The club has five English gallopers, seven local studs, and two ponies for children. The club is open every day for visits and riding.

Hutovo blato - Čapljina

Riječ je o jednome od najbogatijih rezervata ptica močvarica u Europi. Udaljeno je 8 km od Čapljine, a prostire se na površini od 7 000 ha. U okrilju netaknute prirode svoje zimsko utocište nalazi preko 200 vrsta ptica. Vode Hutova blata bogate su ribom, od kojih prevladavaju jegulja i šaran. Na uzvišenju Karaotok smješten je istoimeni motel s 35 ležaja, koji nudi odmor, ribolov i čuveni foto - safari.

This is one of the richest reserves of wading birds in Europe. It is 8 km away from Čapljina, and it covers a 7000 ha surface. In the shelter of untouched nature every winter over 200 birds find their refuge. The water of Hutova blato is rich with fish, the most frequent of which are eel and carp. On the Karaotok mount there is a motel with the same name, with 35 beds, that provides relaxation, fishing, and the famous photo-safari.

Počitelj počini uz put

Tvrđava i stari grad / Fortress and Old Town

U dolini Neretve, glavno uporište u obrani od Turaka bilo je u Počitelju. Ovu tvrđavu je sagradio kralj Tvrtko godine 1383., i imala je stratešku ulogu u kontroliranju puta do mora dolinom rijeke Neretve. Danas, povijesni gradić Počitelj, izgrađen ispod tvrđave, ima orijentalni izgled i kao takav potpuno je u funkciji turizma i kulturnih priredbi. Udaljen je svega 3 km od Čapljine.

Počitelj was the backbone of the defence against the Turks in the valley of the river Neretva. This fortress was built by King Tvrtko in 1383, and it had a strategic role in controlling the way to the sea through the Neretva valley. Today, the historical town of Počitelj, built under the fortress , has an oriental style, and is completely in the function of tourism and cultural events. The town is 3 km away from Čapljina.

Likovna kolonija / Art colony - Počitelj

Ova likovna kolonija je najveća kolonija u jugoistočnoj Europi. Svake godine u ljetnom periodu okupi mnoge umjetnike iz raznih dijelova Europe i kao takva je veoma zanimljiva turistima koji posjećuju stari grad Počitelj.

This art colony is the biggest colony in South - East Europe. Every year in the summer this colony gathers many artists from different parts of Europe presenting a spot of interest for tourists visiting the Old Town of Počitelj.

Ovaj mladi vinar je nastavio stoljetno obiteljsko bavljenje vinarištvo oplemenivši ga novim tehnologijama i naslijedom ljubavlju prema proizvodnji ovog plemenitog pića. 1996. godine vinarija na tržište plasira vino sa zaštićenim geografskim podrijetlom, a u vinariju se uvodi ganymede tehnologija. Uspoređno podiže nove vinograde na probranim lokalitetima Trebižata i dubravske visoravni. Pored Žilavke i Blatine Podrum Rebac proizvodi vino Chardonnay.

This young winemaker has continued a centuries old family wine business ennobling it with new technologies and the inherited love for the production of this noble drink. In 1996, the winery places wine with protected growing properties in the market, and introduces the ganymede technology in the production. At the same time new vineyards are planted in the carefully chosen locations of Trebižat and the Dubrave platform. Beside Žilavka and Blatina, Rebac produces also Chardonnay wine.

Tvrta je nastala na napuštenim i ratom uništenim kapacitetima za proizvodnju vina na lokalitetu Domanovića. Podrum je u cijelosti obnovljen i izgrađena je vinarija 1997. godine. Nabavljena je najmoderna oprema za primarnu preradu „Bucher Vaslien“ Francuska i hlađenje na strojevima „Padovan“. Proizvode se vrhunska vina, a pjenušac od Žilavke je prvi i još uvijek jedini na prostorima BiH. U podrumu je i najveća drvena bačva u BiH kapaciteta 16.230 litara. Dugogodišnju tradiciju proizvodnje vina potvrđuju i brojne domaće i međunarodne nagrade. Uz proizvodnju vina, vinarija je otvorena cjelokupnoj javnosti, a posjećuje je veliki broj ljubitelja vina iz svih krajeva. Godine 2007. vinarija ulazi u strateško partnerstvo s tvrtkom M.C.I. d.o.o. Široki Brijeg, čime dodatno pojačava svoju prisutnost na BiH tržištu.

The company was founded in abandoned and war damaged wine production facilities in Domanovići. The cellar was completely renovated and a winery was built in 1997. The most modern equipment was purchased for the primary elaboration „Bucher Vaslien“ from France, and cooling with „Padovan“ machines from Italy. High quality and Žilavka sparkling wines are produced, the first and the only Žilavka sparkling wine in B&H. In the cellar there is the biggest wooden barrel in BiH, 16 230 litres of capacity. Its longstanding tradition of wine producing is confirmed by numerous domestic and international awards. Apart from the production, the winery is open for public and it is being visited by wine lovers from all over the world. The winery entered into a strategic partnership with the M.C.I. Ltd from Široki Brijeg, which additionally strengthened its position in the BiH market.

Ljubuški

www.ljubuski.ba

Oaza u kamenu

Lj

buški kraj s obiljem vode, bogatstvom flore i faune, zacijelo je bio nastanjen u prapovijesno doba, o čemu svjedoče kameni, koštani i metalni nalazi, koji se čuvaju u Muzeju Franjevačkoga samostana Humac, najstarijemu muzeju u BiH. U pisanim izvorima Ljubuški se prvi put spominje 1444. pod nazivom Lubussa.

Ljubuški pripada primorskoj, mediteranskoj i nizijskoj Hercegovini. Uz poznati krški hercegovački reljef, Ljubuški ima i više plodnih polja: Ljubuško, Veljačko, Vitinsko i Studenačko polje, Jezerac i Rastok, njih natapa troimena rijeke Tihaljina - Mlade – Trebižat na kojoj se nalaze dva biserna vodopada – Kravica i Kočuša.

Zbog blage klime i kvalitetne zemljišta, općina Ljubuški je u potpunosti pogodna za bavljenje vinogradarstvom pa zbog toga danas njenim krajolikom dominiraju rodni vinogradi. Uz vinograde, područje Ljubuškoga je prepoznatljivo po proizvodnji i ostalog mediteranskog voća i povrća.

U ovoj općini se još uvijek mogu pronaći autentična hercegovačka sela koja najbolje dočaravaju način života u ovome kraju. Šetnjom kroz ove krajeve će te osjetiti duh i snagu stanovnika ovoga kraja.

Ljubuški, a region rich with water, flora, and fauna, was certainly inhabited in the prehistoric period, testimony of which are the stone, bone, and metal findings, kept in the Museum of the Franciscan monastery Humac, the oldest museum in B&H.

In the written sources Ljubuški is mentioned for the first time in 1444 with the name Lubussa.

Ljubuški belongs to the coastal, Mediterranean, and lowland Herzegovina. Besides the well-known Herzegovina karst relief, Ljubuški has several fertile fields: Ljubuško, Veljačko, Vitinsko and Studenačko fields, Jezerac and Rastok, watered by the three-name river Tihaljina - Mlade – Trebižat, with its two pearly waterfalls, Kravica and Kočuša.

Because of a mild climate and soil quality, the Ljubuški municipality is completely suitable for viticulture, with fertile vineyards dominating its landscapes. Besides the vineyards, the area of Ljubuški is also known for its production of other Mediterranean fruits and vegetables.

In this municipality, authentic Herzegovina villages can be found, best representing the way of life in this area. Walking through this region, you will feel the spirit and strength of its inhabitants.

Muzej / Museum - Humac

U franjevačkom samostanu na Humcu smješten je najstariji muzej u BiH, osnovan 1884. godine, 4 godine prije zemaljskog muzeja u Sarajevu, a njegov najpoznatiji kustos bio je fra Bonicije Rupčić. Muzej je imao više postava od kojih je zadnja napravljena 2002., i smješten je u suterenu samostana. Muzej ima arheološku zbirku, numizmatičku zbirku, lapidarij, sakralnu zbirku i etnološki odjel. U njemu se nalazi glasovita Humačka ploča iz 12. st., vjerojatno najstariji srednjovjekovni natpis u BiH.

The oldest museum in B&H, founded in 1884, four years before the national museum in Sarajevo, is situated in the Franciscan convent on Humac, and its most famous custodian was fra Bonicije Rupčić. The museum has organised various exhibitions, the last one made in 2002 in the basement of the convent. It consists of an archeological, numismatic, stone monuments, and sacral collection and ethnological department. The famous Humačka plate from the 12th century is kept in this museum, probably the oldest Middle Age inscription in BiH.

Galerija / Gallery - Humac

Uz muzejsku zbirku, u sklopu franjevačkoga samostana nalazi se galerija sa stalnim postavom na temu "majka i dijete". U njoj je izloženo 70 tak djela, kipova, slika i crteža naših poznatih majstora, od Meštrovića i Raduša, do Jurkića i Račkoga.

Alongside with the museum collection, within the Franciscanconvent there is a gallery with a permanent exhibition showing the "mother and child" subject. Around 70 works are displayed, among which statues, paintings, drawings of our famous artists, from Meštrović and Raduš to Jurkić and Rački.

Vodopadi / Waterfalls - Kravice

U hercegovačkom kršu, na području općine Ljubuški nalaze se vodopadi Kravice. Svojim tokom rijeka Trebižat stvara ove čudesne i prekrasne vodopade. Visina samih vodopada iznosi približno 28 metara. Ova prirodnja ljepota kroz godinu privuće veliki broj posjetitelja. U ljetnom periodu, zbog nižeg vodostaja rijeke, bazen ispod vodopada nudi uživanje u plivanju i vodenim sportovima. Nema sumnje da su vodopadi Kravice jedna od najljepših prirodnih ljepota u Hercegovini uopće. U svakoj dobi godine, zbog razine vodostaja rijeke Trebižat, vodopadi nude različit doživljaj. U sezoni nekoliko restorana koji se nalaze u blizini samih vodopada nude jela s roštilja i ribiće specijalitete.

Kravice waterfalls are situated in the Herzegovina karst, on the territory of Ljubuški. The Trebižat river, with its course, creates marvellous and beautiful waterfalls. The height of the waterfall is around 28 meters. This natural beauty attracts a great number of visitors in the course of the year. During the summer period, because of the river's lower level, the pool under the waterfalls offers enjoyment in swimming and water sports. No doubt that these waterfalls are one of the most beautiful natural attractions in Herzegovina. In each part of the year, because of different water levels, the waterfalls offer a different experience. During the high season, various restaurants in the vicinity of the waterfalls have grilled dishes and fish specialties in their menus.

Tvrđava Hercega Stjepana / Herceg Stjepan castle - Ljubuški

U srednjem vijeku, ponad Ljubuškog, na vrhu Buturovice po-dignuta je tvrđava koja se obično pripisuje Hercegu Stjepanu - premda je starija od njega. Grad su u 17. stoljeću popravljali dubrovački majstori. Nakon osvajanja, Turci su učvrstili i proširili tvrđavu. Ova tvrđava je imala žitnicu, vodospremnik, zatvor, zapovednikov stan, te u blizini nastambe za vojnu posadu. Početkom 19. stoljeća grad je izgubio vojni značaj i ubrzo počeo propadati. Ova tvrđava danas predstavlja jednu od najvećih turističkih atrakcija na području općine Ljubuški i cijele Hercegovine. Ove godine Općina Ljubuški je izradila projekt za zaštitu i obnovu ove povijesne tvrđave.

The Castle over Ljubuški, on top of Buturovica, usually ascribed to Herceg Stjepan, even if predates him, was built in the Middle Age. After the conquest, the Turks reinforced and enlarged the castle. This castle had a granary, water reservoir, prison, commander's house, and in the vicinity settlements for the army garrison. In the 17th century, the artisans from Dubrovnik repaired the town. In the beginning of the 19th century the town lost its military importance and soon began to decay. This castel represents today one of the biggest tourist attractions in the area of the Ljubuški municipality and the whole Herzegovina. This year, the Ljubuški municipality has drawn up a project for the preservation and reconstruction of this historical castle.

Tradicija proizvodnje grožđa i vina stara je preko 100 godina. Proizvođač vina započeo je proizvodnju 1998. na nagovor prijatelja. Prvi put je vino napunio u butelje koje je sam osmislio i za koje je također dizajnirao etikete. Proizvodnja je rasla tijekom narednih godina, usporedo sa povećanjem vlastite proizvodnje, rasla je i proizvodnja kooperanata. Razvoj je pratilo uređenje i opremanje obiteljskog podruma suvremenim tehnologijama.

Osnovni motiv unaprijeđenja proizvodnje je očuvanje i produženje tradicije s mogućnošću da jedan od trojice sinova, poveća proizvodnju i eventualno se profesionalno bavi proizvodnjom grožđa i vina.

The tradition of grapes and wine production is about 100 years old. In 1998, persuaded by his friends, winemakers, the producer for the first time filled the bottles, made and labelled by him. Over the following years the production increased, and alongside with cellar production the production of the subcontractors increased too. The development included also the arrangement and equipment of the family cellar with modern technologies. The basic motives of production advancement are conservation and prolongation of the tradition with the possibility for one of the sons (three of them) to increase the production and possibly deal professionally with the production of wine and grapes.

Naša su vina održaz naše ljubavi. Održaz predanog rada i energije koju ulažemo. Održaz Hercegovine i njenih prirodnih ljepota. Skupa s vinima učimo i rastemo. Sretni smo i ponosni kada pronađu put do vas i ispričaju vam priču. Priču koja traje i ostavlja trag.

Naši vinogradi, zasadeni Žilavkom, Blatinom i uz ponešto ostalih sorti, diju so Mostarskog vinogorja, a nalaze se u neposrednoj blizini podruma u Radišićima (Ljubuški). Uz mnogo pažnje, znanja i strpljenja, brižno i kroz cijelu godinu vino radimo i gradimo u vinogradu jer čvrsto vjerujemo da samo vrhunsko grožđe daje vrhunska vina. Imamo i salu za degustaciju kapaciteta 15 osoba.

Our wines are a reflection of our love. Reflection of our dedicated work and the energy we invest. Reflection of Herzegovina and its natural beauties. Along with the wines, we learn and grow. We are happy and proud when they find the way to you and tell you the story. The story that lasts and leaves a trail.

Our vineyards, planted in Žilavka, Blatina and some other varieties, are part of the Mostar winegrowing region, situated near the cellar in Radišići (Ljubuški). With a lot of care, knowledge and patience, throughout the year we work and make the wine because we firmly believe that only top-quality grape gives top-quality wines. We also have a tasting room with a capacity of 15 persons.

Stolac

www.stolac.ba

osvježi se povješću

S

tolac je grad smješten u jugoistočnom dijelu Bosne i Hercegovine, na krajnjem istoku Hercegovačko-neretvanske Županije. Grad je nastao na obalama rijeke Bregave, a okružuju ga planina Hrgud te Vidovo polje s okolnim mjes-
tim koja su ispisana perom bogate kulturne prošlosti. Prilaz Stolcu sa zapadne strane čini Dubravskva visoravan,
koja je specifična i poznata po breskvi i po dubravskom vinogorju po kojem su poznata stolačka vina.

Stolačko područje je svojim mediteranskim šarmom, dobrom vodom, blagim nebom, pitomim krajolikom i skla-
dom prirodnih ljepota, privlačilo ljude još od prapovijesnih vremena. Iliri i grčki pomorci, rimske patricije, istočno
gotski osvajači, slavenski velikodostojnici, osmanski plemići, venecijanske vojskovođe, austrougarski namjesni-
ci, te mnogi poklonici sunca, svježine rijeke Bregave, kulturno povijesnih valera i tajnovitih poruka iz proteklih
stoljeća, ostavili su ovdje svoj trag: gradine i grobove, imena na pločama-poruke za one koji će za njima doći.

Stolac je prostor s najduljom i najraskošnijom povješću gradskog života u Bosni i Hercegovini, a spada u malu
skupinu balkanskih prostora na kojima su sačuvana materijalna svjedočenja o urbanim oblicima života kroz raz-
doblje dugo preko 3.500 godina, koliko su stari posljednji poznati nalazi ilirskog grada Daorsona.

Stolac is a town situated in the south-eastern part of Bosnia and Herzegovina, in the uttermost east of the Herze-
govina-Neretva Canton. The town was erected on the Bregava riverbanks and it is surrounded by mount Hrgud
and the Vidovo field with neighbouring places rich in cultural history. The western access into Stolac is the Du-
bravsk plateau, particularly known for peach growing and, above all, Dubrave vineyards and the famous wines
from Stolac.

The area of Stolac has been attracting people since prehistoric times with its Mediterranean charm, good water,
serene sky, tame landscape and harmony of natural beauties. Illyrians and Greek sailors, Roman patricians, Gothic
invaders from the east, Slavic high dignitaries, Ottoman nobles, Venetian soldiers, Austro-Hungarian governors,
and many other admirers of sun, fresh Bregava waters, cultural and historical values and mysterious messages
from the centuries long gone, have left their mark in this area: hill-forts and tombstones, names on stone plates
– messages for those to come after them.

Stolac is the place with the longest and the richest history of urban life in Bosnia and Herzegovina. It belongs to
a small group of places in the Balkans where material evidence of urban life have been preserved for over 3,500
years, dating back to the time of the last discovered remains of the Illyrian town, Daorson.

Radimlja

Radimlja je napoznatiji lokalitet stećaka - srednjovjekovnih nadgrobnih spomenika u Hercegovini. Na tom lokalitetu se nalaze 133 stećka različitih oblika i dimenzija. Svakodnevno je dostupan za razgledavanje.

Radimlja is the most famous location of medieval tombstones in Herzegovina. In this site there are 133 tombstones of different size and shape. It's available for visits every day.

Helinistički grad Daorson - Ošanići
Hellenistic town of Daorson - Ošanići

Ovaj grad datira iz Ilirskog vremena premda je na ovom lokalitetu kontinuirano postojalo naselje već od 16. - 17. stoljeća prije Krista. Daorson je grad plemena Daorsa koji je za vrijeme Rimljana imao jednu vrstu autonomije. Sastavljen je iz tri djela: Akropole, predakropskog prostora i stambeno-gospodarskog dijela. S napadom Dalmata iz pravca Cetine razara se 43. i 44. godine i definitivno prestaje život u ovom gradu. Spada u nacionalne spomenike BiH.

This town dates back to the Illyrian period, even though ever since the 16th and 17th century B.C., a settlement has continually existed in this location. Daorson is the town of the tribe Daors, who enjoyed a sort of autonomy during the Roman rule. It consists of three parts: Acropolis, pre-acropolis area, and a residential-economic part. With the invasion of the Dalmatians from the Cetine direction, it was completely destroyed, and in 43 and 44 A.D., life definitely perishes in this town. It belongs to the national monuments of B&H.

Krš, kamen, sunce, maslina i vinova loza već odavno na dubravskoj visoravni čine jedinstvo koje prkositi vremenu o čemu svjedoče i crteži na stećima u Radimlji kod Stoca (15. stoljeće) ukrašeni motivima grožđa.

Od utemeljenja 1948. godine do danas, vina iz ove vinarije dobivala su najviše ocjene i laskava priznanja. Osvajaju prestižne nagrade od Pariza, Zagreba, Beograda, Novog Sada, Splita, Mostara itd. Tako je na nedavno održanom međunarodnom ocjenjivanju vina u Splitu, gdje je bilo izloženo preko 220 vrsta bijelih vina, Žilavka-Stolački podrumi, osvojila zlatnu diplomu, čime je potvrđen veliki potencijal sorte Žilavke kao sorte za vrhunska i najbolja vina svijeta.

Vinarija Stolački podrumi u obiteljskom je vlasništvo i raspolaže vlastitim plantazama na površini oko 130 hektara. Svake godine poduzeće se po uzoru na najnovije europske standarde i tehnologije. Zlatno-zelenkasta boja Žilavke mješavina je jantara i dijamantata, ona je tekuće zlato zemlje, govoris jasno, bez primisli i skrovite namjere.

Karst, stone, sun, olive, and grapevine have been creating for ages a unity that defies time, testimony of which can be found on the tombstones (stećci) drawings in Radimlja near Stolac (15th century) decorated with images of grape clusters.

From its foundation in 1948 to the present, wines from this winery have obtained highest grades and complimentary acknowledgements. They have won prestigious awards in Paris, Zagreb, Belgrade, Novi Sad, Split, Mostar, etc. In the recently held international evaluation of wines in Split, where over 220 white wines were presented, Žilavka - Stolac cellars won a gold diploma, thus proving the great potential of the Žilavka variety as a variety for high quality and best world wines.

The winery Stolac cellars are family owned and dispose of its own plantations on a 130 hectares area. Every year 15 hectares of autochthonous varieties Žilavka and Blatina are planted, and the production is done according to the newest European standards and technologies. The gold - greenish colour of Žilavka is a blend of amber and diamonds, it's the liquid gold of the soil, it speaks clear, without afterthought or hidden intention.

najljepši grad u jadranskom zaledu

S

ve u Trebinju dođe kao beskrajni niz paradigm (i oko njega): Da na malom krševitom prostoru postoje neki objekti i neka mjesta i pojave kojima, poput prave Bachelard-ove kuće, odjekuje veliki kosmički ritam prirode, ljudi i jeseni (ili proljeća, nevažno). Ovaj najjužniji grad Bosne i Hercegovine izgrađen je na obalama rijeke Trebišnjice, a najnovija arheološka istraživanja potvrdila su činjenicu o kontinuiranom životu ljudi na ovim prostorima od paleolita do danas. Praistorijskih objekata, tumulusa i gradina, ima na hiljadu i do sada je arheološki istraženo svega jedan postoj tako da Trebinje nosi i sinonim grada-muzeja i smatra se najljepšim gradom u BiH i na jadranskom zaledu.

Jedna je od najstarijih teritorijalno-političkih jedinica na ovom prostoru i formirana je odmah po dolasku Slavena na Balkan. Nazvana je Travunjom i prostirala se na jugu do Dubrovnika, na sjeverozapadu do Gacka i na jugoistoku do Risan. U ovoj oblasti nalazio se pet gradova među kojima i Trebinje. Ne zna se sa sigurnošću kakav je bio karakter ovih gradova, ali se zna da su to bili vojni centri odnosno utvrđena mjesta. Centar ovih gradova bio je Trebinje po čemu se ova oblast i naziva i danas naziva Trebinjska. Trebinje je danas administrativni i kulturni centar istočne Hercegovine.

Everything in Trebinje (and around it) seems as an endless line of paradigms: there are some buildings, places and occurrences in this small, rocky area which, same as the Bachelard's house, echo with the rhythm of nature, people and fall (or spring for that matter, it doesn't matter). This most southern town in Bosnia and Herzegovina is built along the banks of the river Trebišnjica. Recent excavations proved that people have been living here since the Palaeolithic times. There are thousands of prehistoric structures, tumuli and fortifications out of which only one percent have been explored. For this reason, Trebinje is considered as a town-museum, the most beautiful town in Bosnia and Herzegovina and the Adriatic hinterland.

It is one of the oldest territorial and political entities in this area, established following the arrival of the Slavs to the Balkans. It was named Travunia and it occupied the area between Dubrovnik in the south, Gacko in the north-west and Risan in the south-east. There were five towns in this area, including Trebinje. It is not certain what the role of these towns was but it is known that they were military centres or rather fortifications. Trebinje was the most important of them, therefore the whole area is nowadays named after it. Today, Trebinje is the administrative and cultural centre of the Eastern Herzegovina.

Prodica Andelić se uzgajom i preradom vinove loze bavi se više od jednog vijeka. Kao i tada u stvaranju njihovih vina i danas učestvuju isključivo članovi porodice koji svojom posvećenošću i ljubavlju postižu vrhunski kvalitet svih vina. Proizvodni kapacitet vinskog podruma Andelić je 150.000 litara godišnje. Vinarija raspolaže izdvojenom prostorijom za prijem i primarnu preradu grožđa cca 200m², prostoriju za fermentaciju površine oko 200 m² i 70 m, opremljenu najmodernijom opremom što, uz primjenu adekvatne i savremene tehnologije, omogućava potpunu kontrolu procesa stvaranja vina u ovoj delikatnoj fazi. Podrum za odležavanje vina površine cca 200 m² se čitavom svojom površinom nalazi sedam metara pod zemljom, ukopan u stijenu, tako da pruža prirodne uslove za dozrijevanje vina na konstantnoj temperaturi. U toku je i obnavljanje porodičnih vinograda na kojima se od davnina uspješno uzgajala žilavka i vranac i od njih se dobivala posebna vina. Vinograd je u prošlosti brajao i do 14.000 čokota žilavke i 12.000 čokota vranca. Ova vinarija dobitnik je više nagrada na regionalnim i internacionalnim sajmovima za vrhunski kvalitet ocjenjenih vina.

Andelić family has been growing and processing grapes for over a century. Creation of their wines has been an exclusive responsibility of the family members who achieved the premium quality of the wines thanks to their devotion and love. The production capacity of the Andelić cellar is 150,000 litres per year. The winery consists of a 200 m² space for reception and primary processing of grapes, 200 m² of space for fermentation equipped with the most modern equipment which, together with adequate and modern technology, allows for total control over the wine making process in this delicate phase. The cellar is approximately 200m², seven meters underground, built into rock and offering natural conditions for wine aging at constant temperature. Family owned vineyards where žilavka and vranac have been cultivated for ages are currently being regenerated. The vineyards used to have up to 14,000 vines of žilavka and 12,000 vines of vranac. The winery has been awarded a number of medals for the premium quality of its wines at regional and international fairs.

Monasi manastira Tvrdoš, započeli su pre desetak godina novo poglavlje u priči o manastirskom vinarstvu kod nas. Preuzeли su brigu nad vinovom lozom u Trebišnjском polju gde su stari zasadi Vranca smješteni na 70 hektara površine i podigli čak 60 hektara mlađih vinograda u Popovom polju. Danas manastir ima dva podruma. U starom kamenom podrumu iz 15. vijeka, u stoljetnim hrastovim bačvama sazrijeva vranac, a samo desetak metara dalje, uz samu Trebišnjicu, ukopan je novi podrum opremljen najsvremenijom tehnologijom, ali savršeno uključen i postajeći kompleks. Podrumi manastira Tvrdoš njeguju tradicije monaškog vinarstva i hercegovačkog podneblja, proizvodeći vina od autohtonih i internacionalnih sorti u podrumu iz 15. vijeka. Žilavka, vranac, šardone, kaberne sovinjon, ali i manastirska loza, proizvode se kombinovanjem drevnih i najsvremenijih tehnologija. Tvrdoška vina nagradjivana su srebrnim medaljama na Dekanteru u Engleskoj, Mundus vini u Njemačkoj kao i zlatnim medaljama u Austriji.

The monks of the Tvrdoš Monastery opened a new chapter of the wine making story in monasteries ten years ago. They started working old Vranac vineyards covering 70 hectares of land and planted new 60 hectares of vineyards in Popovo polje. The monastery has two wine cellars. Vranac ages in hundred years old oak barrels in an old cellar from the XV century and only ten meters away, next to the bank of the river of Trebišnjica, a new cellar has been build and equipped with the modern technology. Cellars of the Tvrdoš Monastery apply traditions of monasteries viticulture and Herzegovian climate, producing wines made of autochthonous and international varieties of grapes in the cellar from the XV century. Žilavka, vranac, chardonnay, cabernet sauvignon and traditional monastery varieties are combined using ancient and modern technologies. Tvrdoš wines have been awarded silver medals for its quality.

Od 1982. godine se bave ograničenom proizvodnjom vrhunskih vina i alkoholnih pića. Vinarija se oslanja na moderne tehnologije, kontrolisane procese fermentacije i tradicionalne metode odležavanja vina u hrastovim "barrique" bačvama u podrumima osam metara ispod zemlje. Proizvodnja je isključivo usmerjena na kvalitet što pokazuju i mnogobrojna priznanja iz zemlje i inostranstva. Ove godine proglašena je najboljom vinarijom Jugo-istočne Evrope i jedina vinarija u regionu koja je proizvela i prvo prirodno pjenušavo vino. Vinska galerija na šestom i sedmom spratu vinarije, kapaciteta 300 mjeseta, sa panoramskim pogledom na grad i vinograde, stvarstava je među nezabudljivim odredišta ljubitelja vina. Ova vinarija je, za svoja vina, dobila zlatne medalje za kvalitet u Parizu, Ženevi, Milansu, Bergamu, Pragu, Bruselu i Beču AWC.

Carski vinogradi se nalaze na lokalitetu Ušće 10 km od Trebinja na ušću dvije rijeke, Trebišnjice i Sušice. Te vinograde su krajem XIX vijeka Austro-Ugarska monarhija proglašila najpogodnijim za žilavku te je tu na površini od 2 hektara podigla čuvene Carske vinograde.

Operate in the limited production of premium quality wines and alcoholic beverages since 1982. The winery employs modern technologies, controlled processes of fermentation and traditional aging methods in the oak "barrique" barrels kept in underground cellars, eight meters deep. It has been awarded a title of the best winery in the South East Europe and it is the only winery in the region that produces natural sparkling wine. The wine bar at the sixth and seventh floor of the winery, accommodating 300 guests, with a stunning view of the town and vineyards makes it the most attractive destination for all wine lovers. This winery has been awarded gold medals for quality of its wines in Paris, Geneva, Milan, Bergam, Prague, Brussels and Vienna.

Tsar's vineyards are located at Ušće, 10 km away from Trebinje, close to the confluence of two rivers, Trebišnjica and Sušica. Austro-Hungarian wine experts had found the land was the most appropriate for growing žilavka variety and erected vineyards over 2 ha of land at the end of XIX century.

Prodica Berak je jedna od najstarijih porodica na području Trebinja. Tradicionalno se bave uzgojem vinove loze od dolaska na prostore ove hercegovačke opštine, a smatra se da su doselili u 17. vijeku. Spoj nauke i višestoljetnog obitavanja na hercegovačkom sunu učinilo je ovaj podrum danas prepoznatljivim po specifičnom Rujnom vinu proizvedenom od prastarih sorti surca, kadaruna i plavke. U podrumu koji se nalazi u trebinjskom gradskom naselju Police možete uživati i u vrancu, žilavci, chardoney-u i merlot-u.

The Berak family is one of the oldest families in the Trebinje area. Traditionally, they have been into wine production ever since they inhabited this Herzegovina area, and it is believed they came sometimes in the 17th century. Blend of science and centuries of residence in the Herzegovinian sun has made this cellar distinctive by specific RUJNO wine produced from ancient varieties of Surco, Kadaran and Plavka. In this wine cellar, located in the Trebinje suburban settlement called Police, you can enjoy Vranac, Žilavka, Chardoney and Merlot wines.

Na sredini Popovog Polja, 30 kilometara od Trebinja na putu za Mostar, i 12 kilometara od manastira Zavala i pećine Vjetrenica, nalazi se podrum porodice Andušić. U ambijentu tipičnog hercegovačkog sela Dračeva ovaj podrum istog imena nudi vrhunска вина Žilavku i vranac proizvedenom od grožđa iz vinograda u koje gledate dok uživate u ovim vinima. Kako biste na pravi način osjetili tradiciju uzgoja vinove loze u ovom dijelu Hercegovine i doživljali ruralnu Hercegovinu ovaj podrum nudi i sir i pršut iz vlastite proizvodnje. Prenoseći i usavršavajući znanje o grožđu i vinu sa koljena na koljeno porodica Andušić došla je do zavidnog znanja i kvaliteta u proizvodnji vina tako da danas iz ovog podruma izlaze vrhunske hercegovačke sorte vina.

In the middle of Popovo Polje, 30 km from Trebinje, on the road to Mostar, and 12 kilometers from the Zavala Monastery and Vjetrenica cave, there is a cellar of the Andušić family. In the ambience of a typical Herzegovian village Dračeva, the cellar of the same name offers wines of Žilavka and Vranac produced from grapes grown in vineyards that you overlook while enjoying the wines.

In order to feel the tradition of winegrowing in this part of Herzegovina and experience rural Herzegovina, this cellar offers cheese and ham from its own production.

Passing on and perfecting the knowledge of grapes and wine from generation to generation family Andušić came to great knowledge and quality in the production of wine, so today this basement can provide top Herzegovian wines.

Vinski podrum "MARIĆ" je oformljen 2012. godine i, u stvari je nastavak viševjekovne vinske i vinogradarske tradicije porodice Marić čija imanja se nalaze u Trebinjskom i Petrovom polju pa do granice sa Dalmacijom (Konavli) gdje se i nalazi selo Poljice (par kilometara od Konavala) rodno selo porodice Marić. Treba napomenuti da se vinarija, uglavnom, snabdijeva grožđem iz vinograda Petropavlovo manastira (4 vijek) koji se nalazi u blizini podruma. Sa te mikrolokacije u doba Austrougarske monarhije slato je vino za Beč, kao izuzetno kvalitetno. Vinski podrum "MARIĆ" proizvodi oko desetak hiljada boca kvalitetnih vina: vranac, šardone i merlo. Takođe raspolaže sa mogućnošću da primi istovremeno cca 100 turista, tj. da ih posluži mezom i vinkima u jednom zatvorenom i dva poluotvorenim (nadstrešnice) prostora. Takođe, treba napomenuti da je obezbijeden pristup asfaltnim putem autobusima do vinarije i da se ona nalazi na putu Trebinje-Dubrovnik na izlazu iz grada Trebinja.

Marić wine cellar was established in 2012. It actually builds up on the several centuries old family tradition of viticulture and wine making. Family owned estates are located in the Trebinje and Popovo fields, bordering with Dalmatia (Konavli) where the birthplace of the Marić family, the village of Poljice, is situated. Majority of grapes processed by the winery comes from the neighbouring vineyards of the St. Paul and Peter's Monastery (VI century). During the Austro-Hungarian rule, the premium quality wines produced at this micro-location used to be sent to Vienna. The Marić winery produces about 10,000 bottles of quality wines: vranac, chardonnay and merlot. It can also accommodate about 100 visitors in one closed and two semi opened spaces offering buffets and wines. Access for visitors is possible by busses.

Gastronomija Vinske ceste / Gastronomy of Wine Route

Sir iz mijeha / Sack cheese

Sir iz mijeha je jedan od najstarijih i možda najskromnijih proizvoda Hercegovine, čije porijeklo seže čak do ilirskih pastira Dinarskih Alpa, a koji je stoljećima hranio lokalno stanovništvo, čak i u periodima gladi: to je otporan sir, masan, hranljiv, koji je zahvaljujući posebnoj obradi preživljavao i najteže zime.

Radi se o siru od ovčjeg, kravljeg ili kozićeg mlijeka, koji sazrijeva u mješinama od ovčje kože: to je genijalan sistem za čuvanje i transport lako kvarljivog prehrabnenog proizvoda, a i način da se ne protrači ni jedan dio zaklanih životinja.

Sir iz mijeha, radi svojih karakteristika nije moguće proizvoditi industrijski, a od 2006. je postao prisutan na međunarodnoj Slow Food sceni te je ponosno predstavljao Bosnu i Hercegovinu na značajnim sajmovima sirova u Italiji.

It is one of the oldest and perhaps the most humble product of Bosnia and Herzegovina, whose origin dates back to the times of Illyrian shepherds from Dinaric Alps. It has been consumed by the local population for centuries. It is a resistant, fatty and nutritious cheese that due to the special treatment, has managed to survive even the toughest winters providing people with safe existence.

It is a cheese made from sheep , cow or goat milk, which matures in the sacks made of sheep skin. It is an ingenious system for storage and transport of a perishable food product, and a way not to waste any part of the slaughtered animal.

Sack cheese, due to its features cannot be produced industrially, and in 2006 it has entered the international Slow Food scene and proudly represented Bosnia and Herzegovina in some of the most important Cheese fairs in Italy.

Sir Škripavac / Škripavac cheese

Ukoliko jedan proizvod postane simbol nekog mjesta to je zato što u sebi nosi boje, okuse, istoriju i zvukove tog mjesta. Upravo je zvuk osnovna karakteristika škripavca, sira "koji škripi", a čije ime dolazi od onomatopejskog glagola jer se pod zubima osjeti i čuje blago škripanje.

Ovaj sir pravljen od kravljeg mlijeka može se konzumirati odmah nakon par sati od trenutka sirenja. Sušenjem do dva mjeseca, u zavisnosti od vlažnosti zraka i vjetra, dobija se njegova suva varijanta. Tako sušen tradicionalno se stavlja i u mješavinu maslinovog i običnog ulja u kom odležava najmanje tri mjeseca. Ovako pripremljen škripavac se „ponovo rađa“ i zove se jednostavnim imenom „sir iz ulja“ te spada u lokalne delicije koje se serviraju uz kvalitetan pršut i neko od mnogobrojnih hercegovačkih vina.

Ručno obrađivan prema praksi koja se prenosi s generacije na generaciju, škripavac predstavlja specijalitet područja južne Hercegovine, a moguće ga je kupiti direktno od proizvođača na prelijepoj Trebinjskoj pijaci.

If a product becomes a symbol of a place, it is because it carries the colors, tastes, sounds and history of the place. It is the sound that is the major characteristic of squeaking cheese – a cheese that “squeaks”, whose name comes from the onomatopoeic verb “to squeak”, because one can feel slight squeaking when chewing a piece of this cheese.

The cheese, which is made of raw sheep or cow milk, can be consumed immediately after the curdling procedure. Following a drying period which can take up to two months, depending on the relative humidity and wind, it turns into its dry variety. Dry cheese is then soaked in a mixture of olive and sunflower oil and is let to age for at least three months. Following its aging period, the cheese is reborn and gets a simple name “cheese from oil”. In this form, it is considered a local specialty and served with a good quality dried ham and one of numerous Herzegovinian wines.

Manually processed according to the practice passed down from one generation to another the squeaking cheese represents the specialty of southern Herzegovina, and can be bought directly from the manufacturers or at the wonderful markets located between Trebinje and Ivanica.

Livanjski sir / Livno cheese

Priča o Livanjskom siru je možda i jedna od najljepših priča vezanih za jedan proizvod, koja je počela krajem XIX stoljeća, a u kojoj se, u pozadini velikih europskih događaja isprepliću priče o prvim agronomima. U tadašnjem austrougarskom carstvu, Franjo Josip odlučuje da otvorí poljoprivrednu stanicu u Livnu i tako ni ne znajući, odredi sudbinu francuskog agronoma Cyprian Jaillet-a iz Lorene, koji biva pozvan da 1900. dođe i njome upravlja. Iako je znao praviti odlične švicarske sireve, Jaillet je eksperimentirao i sa drugim kombinacijama i tako je nastao "balkanski ementaler", koji nakon Prvog svjetskog rata postade poznat kao livanjski sir.

Precizan recept koji se primjenjuje još i danas, a koji dozvoljava mala odstupanja, predviđa mješavinu nepasterizovanog ovčjeg i kravljeg mlijeka u omjeru 80:20. Kod sira koji nije mnogo sazrio kora je tanka, posjeduje tipičnu svjetlo-žutu boju.

The story of the Livno cheese might be one of the most beautiful stories relating to a simple product. It starts at the end of XIX century and it is a story about first agronomists and romances taking place in the background of great European events.

Livno was part of the Austro-Hungarian Monarchy, and Franz Joseph decided to establish a school and an agricultural station. A French agronomist, Cyprian Jaillet from Lorena, was invited in 1900 to manage the school and the station. Even if Jaillet was able to make excellent swiss cheeses he experimented with other combinations and invents this "Balkan ementaler", which was named "Livno cheese" after the First World War.

His precise recipe is still being used. It allows for just a minor variation in the 80:20 ratio of the sheep and cow milk used. In cheese that is not fully matured, the skin is thin, typically light yellow that cannot be found in other Bosnian cheeses.

Pršut / Prosciutto

Na dva koraka smo od Dalmacije, još jednog područja sa dobrim pršutom, ali bilo bi pogrešno udružiti ove proizvode samo zbog geografske blizine. Druga voda, drugi vjetrovi, drugo drvo obilježavaju prekrasne pršute iz zapadne Hercegovine: to su vode rijeke Trebižat, bistrе, plahovite, krške pritoke Neretve. To su bura i jugo, koji se susreću i sudaraju i pušu samo ovđe. To je dim graba i bukve, drveća sa visokih nadmorskih visina obližnjih planina. Druga klima mu zatim daje posebnost: nema vlage, nema rose ujutro, niti mraza zimi.

Svinje u ovom području su slobodne, hrane se krompirom iz Vodice, šipcima i smokvama iz Počitelja, pšenicom, raži, ječmom, kukuruzom mljevenim u mlinovima u Čapljini.

I trave sa kojima se začine butovi, uz so, biber, bijeli luk, dio su raskošne raznolikosti biljaka koje su osnova velikog hercegovačkog meda.

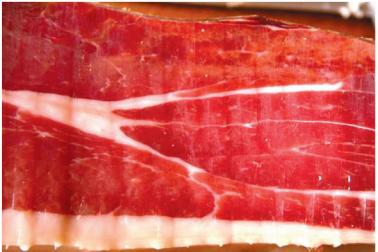

We are at two steps from Dalmatia, another area with good prosciutto; however, it would be wrong to associate these products just because of their geographical proximity.

Different waters, different winds, and different wood mark the beautiful hams from western Herzegovina. These are the waters of the river Trebižat – the bright, impetuous, karst tributary of Neretva. These are the bora and sirocco, which meet and collide, while blowing only in this area. This is the smoke from hornbeam and beech – the trees growing at high altitudes in the nearby mountains.

Another air, then, gives it a special feature: there is neither moisture, nor rose in the morning, nor frost and snow in winter.

Pigs in this area are free grazing; they eat potatoes from Vodice, pomegranates and figs from Pocitelj, and wheat, rye, barley and corn grinded in the Čapljina mills.

The herbs used to season the ham along with salt, pepper and garlic are part of the lavish assortment of plants that also make the main ingredients of the famous Herzegovina honey.

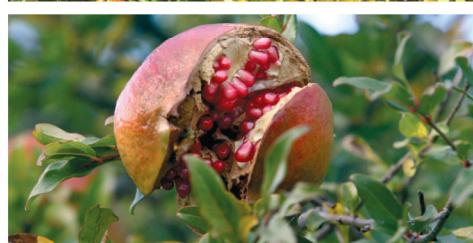

Med / Honey

U Hercegovini se još uvijek mogu naći starinske košnice za proizvodnju meda: to je nasljedstvo koje pričuje o dugogodišnjoj pčelarskoj tradiciji ovog područja. Hercegovački med je jedan od napoznatijih na Balkanu, naročito radi svojih aromatičnih svojstava i radi nezagađene prirode koju karakteriše bogata nektarska vegetacija sa oko 3700 različitih vrsta biljaka, od kojih samo Bosni i Hercegovini ima više od polovice uopće poznatih u cijeloj balkanskoj regiji. Na taj način se dobija med jakog i aromatičnog mirisa koji se ogleda u livadskom medu, medu od vrijeska i medu od žalfije/kadulje.

Miris meda od kadulje je intenzivan i aromatičan. Koristi se sa mesom, pršutom i sezonskim sirom, a najbolji sa onim svježijim. Kao zaslavljač daje svoj maksimum u crnom čaju. Med od vrijeska ima miris srednjeg intenziteta, koji dobro ide sa poluzrelim slasnim srevima, dok je prelijep u mlakom mlijeku, koje pojačava notu toffee karamela.

In Herzegovina, one can still find old-fashioned beehives for honey production: this is the legacy that tells the story of a long beekeeping tradition in this country. Herzegovinian honey, is one of the best known in the Balkans, especially for its aromatic properties and for unpolluted soil in the area where the bees are situated, which is characterized by abundance of herbaceous plants—approximately 3700 of them, of which more than a half generally known in the Balkans grow in Bosnia and Herzegovina. This is the reason this honey has a strong aroma which is reflected in the Meadow Honey (Livadski med), Heather Honey (Med od vrijeska) and Sage Honey.

The scent of sage honey is intense and aromatic. Sage honey is the perfect companion for meat and ham. It is excellent with seasonal cheese, and even better with squeaking cheese. As a sweetener, it gives its maximum when served with a cup of black tea. Heather honey has a gritty taste that goes well with some half-matured flavorful cheeses. It is not recommended to use it as a sweetener because it tends to take over and disappear, while it is delicious in warm milk, which highlights the toffee caramel note.

Nar-Šipak / Pomegranate

Šipak ili nar je definitivno jedan od simbola Hercegovine. Samonikli, divlji šipci se doslovce nalaze na svakom koraku u ovim krajevima. Kao jedan od simbola Hercegovine šipak je postao i omiljeni motiv slikara što se vidi po našim umjetničkim galerijama gdje najmanje jedna trećina slika s motivom mrtve prirode predstavlja upravo šipke. Ovo voće na našem području je jako jednostavno uzgojiti, a najviše je zastupljena sorta Glavaš. Od šipka najčešće konzumiramo zrna, te pravimo popularni sok od šipka (proizvođač soka od šipka je Udrženje Ecoline).

Plod je okruglastog oblika, različite veličine s debelom korom čija je osnovna boja žuta, a sa sunčane strane se u obliku dopunske boje razlijeva crvena. Zrnje je veliko i sočno, svijetlo crvene boje i kiselkastog okusa. Šipak glavaš dozrijeva krajem rujna ili u prvoj polovici listopada.

Pomegranate is one of the most characteristic symbols of Herzegovina. Wild pomegranate can be found almost everywhere from countryside to city centres. It is also a favourite subject for many local painters who dedicate to it a third of their paintings.

Pomegranate is used in a variety of ways notably as pomegranate juice (produced by our member Ecoline Association) and even spread over toast for breakfast. One pomegranate delivers 40% of an adult's daily vitamin C requirement. In addition to being very useful in culinary or medicine pomegranate is also grown as a decorative plant.

Grah Poljak / Pole beans

Grah poljak je jedan od onih proizvoda koji često rastu ne toliko zahvaljujući trudu vrijednih ruku koliko darovima polja i prirode prkoseći tako klimatskim uslovima i škroj hercegovačkoj zemlji.

Grah poljak je nepravilnog oblika, nalik na tucani pijesak veličine oko 1 centimetra. Boja graha je nalik na boju šarenog morskog pijeska tako da ga možemo naći u različitom spektru boja.

U prošlosti je bio jako zastupljen na području trebinjskog kraja i othranio je čitave generacije ranijih naraštaja. A to je sasvim u skladu i s tradicijom vezanom uz bilo koji grah jer je riječ o tipičnoj zimskoj namirnici koju neki nazivaju i sirotinjskim mesom. Poljak, u narodnoj medicini, slovi kao izuzetno zdrava vrsta graha sa neuporedivo boljim svojstvima nego ostale poznate mahunarke. On, kažu u narodu, djeluje na snižavanje holesterola i šećera u krvi te u novije vrijeme nalazi svoju novu perspektivu kao gurmanska delicija. U Trebinju vam ga serviraju uz obećanje zdravlja. Danas, nakon skoro pola stoljeća zanemarivanja, zahvaljujući strpljivom radu Slow Food Conviviuma Trebinje, Hercegovina na ponovnom otkrivanju ovog graha koje je započelo 2005. god, poljak se vratio na polja i na stolove na području Trebinja dokazujući se kao jedan od najvažnijih predstavnika biodiverziteta u regiji.

Poljak beans is one of those crops which successfully grow not only due to care of hardworking farmer's hands but also thanks to its resistance to adverse climate soil conditions. The beans are of irregular shape about 1 cm in size. The colour resembles the colourful sea sand and it can be found in a variety of shades.

Poljak beans used to be a regular crop in the region of Trebinje which fed generations of the local population. It is a typical winter crop, sometimes called the "meat of the poor". Traditional, folk medicine considers it a particularly healthy type of beans, much more beneficial than other types of known legumes. It affects the level of cholesterol and blood sugar and nowadays, it is being rediscovered as a gourmet delicacy. In Trebinje, it is served with a promise of health. After nearly half a century of neglect, thanks to the persistent efforts of the Slow Food Convivium Trebinje, that have been invested in its rediscovery since 2005, Poljak beans made its return to the fields and dining tables in the region of Trebinje as one of the most important examples of the regional biodiversity.

Raštika / Collard

Zima nije zima u Hercegovini bez raštike i suhog mesa: radi se o tradiciji koja je ostala uglavnom nepromijenjena stoljećima a čiju glavnu ulogu igra poseban tip kupusa sa listovima i "bez glavice" čije uzgoj u ovim područjima seže u davnu prošlost.

Raštika je prilično raširena na gradskim pijacama, te je povrće vrlo prilagodljivo svim uvjetima tla i klime, često raste i spontano te se bere u najhladnijim mjesecima.

Prema tome, jasno je zašto je za poljoprivrednike u prošlosti predstavljala dragocjenu hranu u borbi protiv gladi te su brižno čuvali njeno sjeme kako bi osigurali proizvodnju iz godine u godinu; ali još i danas oni koji uzbajaju raštiku ljubomorno čuvaju svoj urod, do te mjere da su odbili da prepuste vlastitu pratnju jednom izuzetnom kupcu kao što je Gospa, koja ju je probala na svom balkanskom putovanju te je ostala zatečena posebnim kiselo slatkim okusom tih nevjerojatnih zelenih hercegovačkih listova.

In Herzegovina, winter is not winter if there is no collard greens and smoked meat. It is a tradition that has remained largely unchanged for centuries, where the cultivation of a special type of cabbage with leaves, but "no cabbageheads" has been playing the key role for centuries.

Collard greens are fairly widespread in the urban green markets. The plant is very adaptable to all conditions of soil and climate and often grows spontaneously. It is harvested in the coldest months.

Thus, it is clear why the farmers have considered it the precious food in the fight against hunger in the past and why they have carefully guarded the seeds to ensure its cultivation from one year to another. However, even nowadays, the cultivators of collard greens still guard their crop protectively to such an extent that they have refused to provide their escort even to an exceptional customer, such as pop star Madonna, who tasted it on her Balkan Tour and was stunned by the special sour sweet taste of these incredible Herzegovina green leaves.

Restorani Vinske ceste / Restaurantes of Wine Route

Restaurant "Udovice"

Adresa / Address
Sretnice b.b. 88203 Kruševac
Tel.: 036 486 389
Fax: 036 486 103
E-mail: restoran@udovice.ba
www.udovice.ba
GPS: N43 16.292 E17 43.723

Restoran Udovice je nastao 1953. zahvaljujući poduzetnosti dvije žene, Kata i Ruže Kordić koje su, kada su ostale udovice, odlučile da otvore odmorište na putu koji povezuje Mostar i Čitluk. Od tada je mjesto bilo poznato kao „kod Udovica“ i još i danas nudi maštovita jela domaće kuhinje, od kojih su janjetina s ražnjom i kruh ispod peke specijalitet kuće. Osim jela nudi se domaća vina i rakije u vinskom podrumu koji se nalazi u sklopu restorana.

The restaurant Udovice opened in 1953 due to the efforts of two women, Kata and Ruža Kordić who, after remaining widows decided to open an inn on the road connecting Mosdtar and Čitluk. Since that time, this place has been known as "at the widows" and it still offers very imaginative domestic dishes and our own specialty among them the lamb, ad home-made bread are truly delicious! We prouce our homemade wine and our wine cellars are situated under the restaurant.

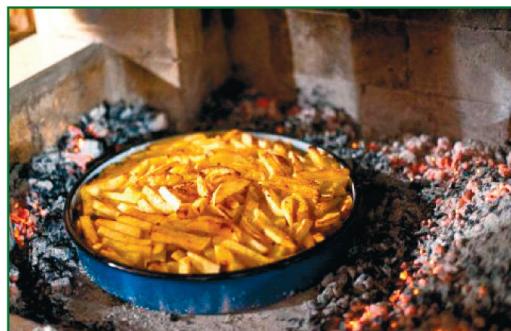

Restaurant "Goranci"

Adresa / Address
Pod jelom b.b. 88000 Mostar-Goranci
Tel.: 036 381167
E-mail: info@konobagoranci.com
www.konobagoranci.com

Vinoteka „Vukoje 1982“ je mjesto u kome se istinski doživljava pravo „vjenčanje“ vrhunskih vina i jela Hercegovine sa posebnim glaskom na „Slow Food“ koncept služenja. U ovom restoranu, koji više od 30 godina njeguje okuse Hercegovine, uživajući u tradicionalnim jelima od tipičnih hercegovačkih proizvoda servirana vrhunskim vina „Vinarije Vukoje“. Sve namirnice koje se koriste za pravljenje vrhunskih delicija u ovom restoranu su iz vlastite organske proizvodnje te je ovaj restoran jedino i pravo mjesto za upoznati eno i gastro raznolikost i ljepotu Hercegovine. Restoran raspolaže sa 50 mesta, a u basti restorana još 40.

Restaurant Wine bar "Vukoje 1982" is a place where you truly experienced a real "wedding" of excellent wines and dishes from Herzegovina with special emphasis on the "Slow Food" concept of service. In this restaurant, which for 30 years nurtured Herzegovina flavors, you can enjoy the traditional dishes of the typical products of Herzegovina served with top quality wines from "Wine cellar Vukoje". All foods that are used to make delicacies at this restaurant are from our own organic production, which makes this restaurant unique and proper place to introduce wine and culinary diversity and beauty of Herzegovina.

Restaurant "Bendiš"

Adresa / Address

Grab b.b., 89101 Trebinje

Tel.: 065 363 586

065 536 820

GPS: N42 36.245 E18 25.478

U autentičnoj hercegovačkoj kući, izgrađenoj 1872. godine nalazi se restoran Bendiš koji nudi tradicionalnu hranu Hercegovine. Lociran na 12.-om kilometru magistralnog puta Trebinje - Herceg Novi, ovaj restoran obezbeđuje puni doživljaj Hercegovine. Pored pečenja ispod sača, svih vrsta roštilja te domaćeg sira i pršut-a ovaj restoran ima i veoma dobu vinsku kartu proizvođača iz Hercegovine. Unutra je na raspolaganju 30 mesta, a na terasi restorana, 100 mesta.

In this authentic Herzegovian house, which was built in 1872, the restaurant Bendiš is offering traditional food of Herzegovina. Located on a 12th kilometer of the highway Trebinje - Herceg Novi, this restaurant provides a full experience of Herzegovina. In addition to 'sac' dishes, all kinds of barbecue and homemade cheese and ham, this restaurant has a very good wine list of producers from Herzegovina. Inside there are 30 seats available and the terrace of the restaurant can seat another 100.

Restoran Hercegovačka kuća nalazi se u sklopu Motela Konak koji raspolaže sa 105 ležajeva i nalazi se na putu Beograd-Sarajevo-Trebinje-Dubrovnik. Restoran Hercegovačka kuća jedinstven je ugostiteljski objekat koji svojim okruženjem, enterijerom i gastro ponudom pruža užitak u najboljem iz Hercegovine. Nudimo cicvaru, pršut, domaći sir škripavac i sir iz ulja, janjetinu sa ražnja, prijesnac, uštipke, kupus raštan sa kaštradinom i druga jela iz hercegovačke kuhinje te vino iz vlastitog podruma.

Restaurant Hercegovačka kuća is part of Motel Konak, which is equipped with 105 beds and located on the Beograd-Sarajevo-Trebinje-Dubrovnik road. Hercegovačka kuća restaurant is a unique facility which offers the best of Herzegovina in its surroundings, interior and cuisine. We offer cicvara, prosciutto, organic skripavac cheese, oil cheese, lamb on the spit, prijesnac, pastries, cabbage and other traditionally Herzegovinan meals as well as the wine from our own cellar.

Restaurant "Studenac"

Adresa / Address

Milentija Perovića b.b., 89101 Trebinje

Tel.: 059 482 627

GPS: N 42° 42,713' E 18° 22,403'

Ako tražite svežu pastrmku, nema boljeg mjesto od Studenca. Studenac se nalazi na kristalno čistoj, hladnoj rijeci Trebišnjici iza Arslanagića mosta. U vrijeme vrućih ljetnih dana, najljepše je sjediti vani. Imamo i vlastiti ribnjak gdje možete izabrati svoju pastrmku. Također, ne zaboravite probati naš domaći hljeb.

If you are looking for fresh trout, there is no better place than Studenac. Studenac is located on the crystal-clear, cold Trebišnjica River and behind the Arslanagić Bridge. During hot summer days, the best choice is to sit outside. We have our own fishpond where you can select your own trout. Also, make sure to try our delicious homemade bread.

Restaurant "Stara Hercegovina"

Adresa / Address

Tuli b.b., 89101 Trebinje

Tel.: 065 669 707

065 778-584

GPS: 42°38'51.00" N 18°22'35.00" E 2097ft

Otvoren 2008., Restoran Stara Hercegovina se nalazi na nekoliko minuta od ceste za Herceg Novi i od glavnih puteva za Trebinje i Dubrovnik, na padinama prelijepog sela Tuli, čija je arhitektura među najreprezentativnijim u lokalnom pejzažu. Karakterizira ga impozantno stablo u glavnoj sali, restoran po načinu kako je namješten priziva - sve originalne zanatske ručne radove - i po strukturi tipičnu hercegovačku kuću.

Opened in 2008, the restaurant Stara Hercegovina is located barely a few minutes from the road to Herceg Novi and the main roads to Trebinje and Dubrovnik. It lies on the sides of the beautiful village Tuli whose architecture is among the most representative in the local surrounding. It is characterized by a tree in the main dining room. The restaurant itself is structured and furnished like a typical Herzegovinian house with original traditional crafts.
